N.S. Trahair, M.A. Bradford, David Nethercot, Leroy Gardner, 2017-12-21 The fully revised fourth edition of this successful textbook fills a void which will arise when British designers start using the European steel code EC3 instead of the current steel code BS5950 The principal feature of the forth edition is the discussion of the behaviour of steel structures and the criteria used in design according to the British version of EC3 Thus it serves to bridge the gap which too often occurs when attention is concentrated on methods of analysis and the sizing of structural components Because emphasis is placed on the development of an understanding of behaviour many analytical details are either omitted in favour of more descriptive explanations or are relegated to appendices The many worked examples both illustrate the behaviour of steel structures and exemplify details of the design process The Behaviour and Design of Steel Structures to EC3 is a key text for senior undergraduate and graduate students and an essential reference tool for practising structural engineers in the UK and other countries Designers' Guide to EN 1991-1-2, EN 1992-1-2, EN 1993-1-2 and EN 1994-1-2 Tom Lennon, 2007-01-12 A guide

to 4 documents EN1991 Part 1 2 EN1992 Part 1 2 EN1993 Part 1 2 and EN1994 Part 1 2 It provides an introduction to the procedures required to achieve design solutions for a typical range of structural elements and assemblies Worked examples are included to illustrate the use of the Eurocodes for specific design scenarios **Designers' Guide to EN 1992-1-1**
