strategies that support student and faculty engagement and inclusion in the academy. These strategies are anchored by a brief exploration of the history and effects of exclusion and deprivilege in higher education. However, while many publications exploring academic inequality focus on the causes and impacts of structural psychological and cultural exclusion based on racism, sexism, classism, and ableism, they rarely engage in interventions to expose and combat such deprivilege. Capturing examples of inclusive practices that are as diverse as student and faculty populations, these strategies can be easily translated and employed by organisations, collectives, and individuals to recognise and combat social and academic exclusion within higher education environments.

International Environments and Practices of Higher Education Andrea Caputo, Deborah Lock, Dieu Hack-Polay, 2022-10-31. This book provides a critical review of the teaching practices in higher education in international contexts. Sticky problems and debates about inclusivity, diversity, and cultural representation in the curriculum and classroom are explored through the eyes of the academics who negotiate complex teaching landscapes.
