Technology (under third factor) that should not be Energy but is. It would be best if other factors are not in Energy. The **Energy** and **Energy** should be changed to **Energy**.

1. **Technological change and innovation:** Technological change is a key driver of economic growth. It is the process of developing new ideas, products, and processes that improve productivity and efficiency. Technological change is often driven by research and development (R&D) activities, which are funded by the private sector, the government, or venture capitalists. Technological change can lead to significant increases in productivity and economic growth, but it can also lead to job displacement and income inequality. Therefore, it is important to have policies in place that support technological change while also addressing the challenges it poses.
2. **Human capital and innovation:** Human capital is the knowledge, skills, and abilities of the workforce. It is a key driver of economic growth, as it allows workers to perform more complex tasks and develop new products and processes. Human capital is often developed through education and training. Investment in human capital is essential for long-term economic growth, as it allows the workforce to adapt to technological change and maintain a competitive edge in the global market.
