How Chinese Teach Mathematics: Perspectives From Insiders Lianghuo Fan, Ngai-ying Wong, Jinfa Cai, Shiqi Li, 2015-03-13 This unique book represents another concerted research effort concerning Chinese mathematics education with contributions from the world's leading scholars and most active researchers. The book presents the latest original research work with a particular focus on the teaching side of Chinese mathematics education to a wide international audience. There are mainly three sections in the book. The first section introduces readers to a historical and contemporary perspective respectively on traditional mathematical teaching in ancient China and on how modern Chinese mathematics teachers teach and pursue their pre-service training and in-service professional development. The second section presents studies investigating a wide range of issues at both the macro and micro levels on how Chinese mathematics teachers teach mathematics. The third section focuses on Chinese mathematics teachers investigating issues about their knowledge, belief, teacher training and professional development. Like its predecessor *How Chinese Learn Mathematics: Perspectives from Insiders*, this book is a must for educational researchers, practitioners and policy makers who are interested in knowing more about mathematics teaching, teachers' teacher education and professional development concerning Chinese teachers and learners.

Crowson, 2017-09-27 *Shaping Education Policy* is a comprehensive overview of education politics and policy which provides conceptual guideposts for future policy development and strategies for change. Literacy and Language in East Asia Marilyn Kell, Peter Kell, 2013-08-13 This book critically explores why some Asian nations are on top of the world in students' achievement tests in reading and literacy yet governments and industry in these nations are anxious about a crisis in education. Why are governments anxious about the capabilities and skills of school and university graduates in a global economy when there is an Asian economic boom? The authors explore questions about how the Asian countries value test-based examination curriculum and its influence on the practices of teaching, learning and the lives of young people in Asia. The authors describe the challenge of change for East Asian nations to develop more relevant approaches to literacy and

language and more inclusive societies focussed on the needs of young people and not exam results **Developing**
