## CHAPTER 1 CRITICAL THINKING, CLINICAL JUDGMENT, AND THE NURSING PROCESS

### AUDIO CASE STUDY

#### Jane Practices Clinical Judgment

1. Identify and analyze cues; prioritize hypotheses; generate solutions; take action; evaluate outcomes; repeat.
2. Jane was exhausted, failed a test, and was pulled in too many directions. She was also crying in her car and had poor study habits and not enough sleep.
3. Jane's resources included a good friend, sick time from work, and wasted time between classes that she could better utilize. Your resources will be different, but they exist!
4. Critical thinking—the *why*: Jane uses critical thinking to determine why her current plan isn't working. She thinks honestly about her poor study habits, her time-management problems, and the impact this is having on her and her family.  
Clinical judgment—the *do*: Jane uses her thinking to develop and carry out a plan that uses her resources and provides more productive study time and more quality time with her kids.

### VOCABULARY

*Sample sentences will vary for the Vocabulary problems.*

#### Nursing process

Definition: An organizing framework that links thinking with nursing actions. Steps include assessment/data collection, nursing diagnosis, planning, implementation, and evaluation.

#### Critical thinking

Definition: The use of those cognitive (knowledge) skills or strategies that increase the probability of a desirable outcome. Also involves reflection, problem-solving, and related thinking skills.

#### Clinical judgment

Definition: The observed outcome of critical thinking and decision making. A process that uses nursing knowledge

to collect appropriate data, identify a patient problem, and determine the best possible plan of action. Clinical judgment is based on good critical thinking.

#### Cue

Definition: Significant or relevant data. Not all data are cues (relevant), but all cues are data.

#### Collaboration

Definition: Working together with the health team to improve patient outcomes.

#### Intervention

Definition: Taking action to carry out a plan.

#### Evaluation

Definition: Comparing the outcomes you expected with actual outcomes. Did the plan work? Were expected outcomes met?

#### Vigilance

Definition: The act of being attentive, alert, and watchful.

## CRITICAL THINKING AND CLINICAL JUDGMENT

Critical thinking and clinical judgment both follow a similar format. Both follow steps from collecting data to determining problems and outcomes, developing and taking actions, and evaluating outcomes. However, critical thinking helps you think *about* the problem; What is it? Why is it happening? And clinical judgment leads you to *do* something to manage the problem.

### CUE RECOGNITION

*You will do many things for each individual, but the FIRST thing is listed below.*

1. Sit the patient upright.
2. Call 911 while running across the street.
3. Elevate the feet off the bed by placing a pillow under the calves and allowing the feet to hang off the edge of the pillow.
4. Check blood glucose and have a glucose source ready.
5. Turn the patient to the side to prevent aspiration.
