Copyright Office, 1941 Catalog of Copyright Entries , 1929 **Weaponized Lies** Daniel J. Levitin, 2017-03-07 Previously Published as *A Field Guide to Lies* We are surrounded by fringe theories fake news and pseudo facts These lies are getting repeated New York Times bestselling author Daniel Levitin shows how to disarm these socially devastating inventions and get the American mind back on track Here are the fundamental lessons in critical thinking that we need to know and share now Investigating numerical misinformation Daniel Levitin shows how mishandled statistics and graphs can give a grossly distorted perspective and lead us to terrible decisions Wordy arguments on the other hand can easily be persuasive as they drift away from the facts in an appealing yet misguided way The steps we can take to better evaluate news advertisements and reports are clearly detailed Ultimately Levitin turns to what underlies our ability to determine if something is true or false the scientific method He grapples with the limits of what we can and cannot know Case studies are offered to demonstrate the applications of logical thinking to quite varied settings spanning courtroom testimony medical decision making magic modern physics and conspiracy theories This urgently needed book enables us to avoid the extremes of passive gullibility and cynical rejection As Levitin attests Truth matters A post truth era is an era of willful irrationality reversing all the great advances humankind has made Euphemisms like fringe theories extreme views alt truth and even fake news can literally be dangerous Let's call lies what they are and catch those making them in the act A Field Guide to Lies Daniel J. Levitin, 2019-11-19 Winner of the National Business Book Award From the New York Times bestselling author of *The Organized Mind* and *This Is Your Brain on Music* a primer to the critical thinking that is more necessary now than ever We are bombarded with more information each day than our brains can process especially in election season It's raining bad data half truths and even outright lies New York Times bestselling author Daniel J Levitin shows how to recognize misleading announcements statistics graphs and written reports revealing the ways lying weasels can use them It's becoming harder to separate the wheat from the digital chaff How do we distinguish misinformation pseudo facts and distortions from reliable information Levitin groups his field guide into two categories statistical information and faulty arguments ultimately showing how science is the bedrock of critical thinking Infoliteracy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media channel including social media We may expect

newspapers bloggers the government and Wikipedia to be factually and logically correct but they so often aren't We need to think critically about the words and numbers we encounter if we want to be successful at work at play and in making the most of our lives This means checking the plausibility and reasoning not passively accepting information repeating it and making decisions based on it Readers learn to avoid the extremes of passive gullibility and cynical rejection Levitin's charming entertaining accessible guide can help anyone wake up to a whole lot of things that aren't so And catch some weasels in their tracks *House Furnishing Review* ,1948 *The American Architect* ,1925 *Journal of Electricity* ,1944
