Reframing Financial Literacy Thomas A. Lucey, James D. Laney, 2012-06-01 Scholarship related to financial and consumer education largely concerns itself with the acquisition management and growth of financial resources In a global setting that witnesses increasing competition for natural resources along with diminishing appreciation for human rights a challenge for financial and consumer educators involves developing foundation for bettering individual wealth in manners that respect all members of a global society Reframing Financial Literacy fills this need by providing literature that examines a broad view of financial literacy by connecting financial practice with issues of citizenship along with personal and professional identity It relates these issues to educational theory and practice to provide the reader with information about the relevance of improving social worth while bettering financial wealth Boasting 14 previously unpublished chapters from an international slate of authors and classroom adaptable lesson plans for each chapter Reframing Financial Literacy will interest both teachers and researchers with its exciting classroom activities and its provocative content This is a must work that no education professional should be without

The Power of the Adolescent Brain Thomas Armstrong, 2016-07-12 Moody Reckless Impractical Insecure Distracted These are all words commonly used to describe adolescents But what if we recast these traits in a positive light Teens possess insight passion idealism sensitivity and creativity in abundance all qualities that can make a significant positive contribution to society In this thought provoking book Thomas Armstrong looks at the power and promise of the teenage brain from an empathetic strength based perspective and describes what middle and high school educators can do to make the most of their students potential Thoroughly grounded in current neuroscience research the book explains what we know about how the adolescent brain works and proposes eight essential instructional elements that will help students develop the ability to think make healthy choices regulate their emotions handle social conflict consolidate their identities and learn enough about the world to move into adulthood with dignity and grace Armstrong provides practical strategies and real life examples from schools that illustrate these eight key practices in action In addition you'll find a glossary of brain terms a selection of brain friendly lesson plans across the content areas and a list of resources to support and extend the book's ideas and practices

There is a colossal mismatch between how the adolescent brain has evolved over the millennia and the passive rote learning experiences that are all too common in today's test obsessed educational climate. See the amazing difference in school and beyond when you use the insights from this book to help students tap into the power of their changing brains. Literacy Work in the Reign of Human Capital Evan Watkins, 2015-07-01. In recent years a number of books in the field of literacy research have addressed the experiences of literacy users or the multiple processes of learning literacy skills in a rapidly changing technological environment. In contrast to these studies this book addresses the subjects of literacy. In other words it is about how literacy workers are subjected to the relations between new forms of labor and the concept of human capital as a dominant economic structure in the United States. It is about how literacies become forms of value producing labor in everyday life both within and beyond the workplace itself. As Evan Watkins shows apprehending the meaning of literacy work requires an understanding of how literacies have changed in relation to not only technology but also to labor capital and economics. The emergence of new literacies has produced considerable debate over basic definitions as well as the complexities of gain and loss. At the same time the visibility of these debates between advocates of old versus new literacies has obscured the development of more fundamental changes. Most significantly Watkins argues it is no longer possible to represent human capital solely as the kind of long term resource that Gary Becker and other neoclassical economists have defined. Like corporate inventory and business management practices human capital labor now also appears in a just in time form as if a power of action on the occasion rather than a capital asset in reserve. Just in time human capital valorizes the expansion of choice but it depends absolutely on the invisible literacy work consigned to the peripheries of concentrated human capital. In an economy wherein peoples attention begins to eclipse information as a primary commodity a small number of choices appear with an immensely magnified intensity while most others disappear entirely. As Literacy Work in the Reign of Human Capital deftly illustrates the concentration of human labor in the digital age reinforces and extends a class division of winners on the inside of technological innovation and losers everywhere else. Innovations in Economic Education Mary Beth Henning, 2016-11-25. Innovations in Economic Education addresses the growing issue of financial illiteracy by showing how economics can be successfully integrated into classrooms from kindergarten through higher education. Pre service teachers experienced educators curriculum leaders parents and school administrators will find practical ideas to improve economic understanding. At the elementary level the book provides creative ways of introducing young students to the basic concepts of economics financial justice and social action. For higher grade levels the book offers ideas to integrate economics into current history civics and math curricula. The final portion of the book features recommendations by leading economic educators on how economics can play a greater role in teachers professional development. The pedagogical tools presented in each chapter include lesson plans and practical insights and are designed to meet the NCSS C3 Framework and Common Core State Standards for Social Studies. This book is a timely and valuable

resource for all educators interested in improving their students economic literacy and financial decision making
