A Guide to Hands-on MEMS Design and Prototyping Joel A. Kubby, 2011-08-25 Whether you are a student taking an introductory MEMS course or a practising engineer who needs to get up to speed quickly on MEMS design this practical guide provides the hands on experience needed to design fabricate and test MEMS devices You will learn how to use foundry multi project fabrication processes for low cost MEMS projects as well as computer aided design tools layout modeling that can be used for the design of MEMS devices Numerous design examples are described and analysed from fields including micro mechanics electrostatics optical MEMS thermal MEMS and fluidic MEMS There s also a final chapter on packaging and testing MEMS devices as well as exercises and design challenges at the end of every chapter Solutions to the design challenge problems are provided online

MEMS: A Practical Guide of Design, Analysis, and Applications Jan Korvink, Oliver Paul, 2010-05-28 MEMS are rapidly moving from the research laboratory to the marketplace Many market studies indicate not only a tremendous market potential of MEMS devices year by year we see the actual market grow as the technology matures In fact these days many large silicon foundries have a MEMS group exploring this promising technology including such giants as INTEL and Motorola Yet MEMS are fundamentally different from microelectronics This means that companies with an established track record in these branches need to adapt their skills whereas companies that want to enter the miniaturization market need to establish an entirely new set of capabilities The same can be said of engineers with classical training who will also need to be educated toward their future professional activity in the MEMS field Here are some questions that a company or technologist may ask I have an existing product with miniaturization market potential Which technology should I adopt What are the manufacturing options available for miniaturization What are the qualitative differences How do we maintain a market lead for products based on MEMS Is there CAD support Can we outsource manufacturing Which skills in our current capability need only adaptation What skills need to be added Professors Jan Korvink and Oliver Paul have set out to answer these questions in a form that addresses the needs of companies commercial practitioners and technologists

MEMS Cost Analysis Ron Lawes, 2016-04-19 This volume demonstrates how cost analysis can be adapted to MEMS taking into account the wide range of processes and equipment the major differences with the established semiconductor industry and the presence of both large scale product orientated manufacturers and small and medium scale foundries The content examines the processes and equipment
