Kenning, 2020-07-16 Old age is currently the greatest risk factor for developing dementia Since older people make up a
larger portion of the population than ever before the resulting increase in the incidence of dementia presents a major
challenge for society Dementia is complex and multifaceted and impacts not only the person with the diagnosis but also those
caring for them and society as a whole Human Computer Interaction HCI design and development are pivotal in enabling
people with dementia to live well and be supported in the communities around them HCI is increasingly addressing the need
for inclusivity and accessibility in the design and development of new technologies interfaces systems services and tools
Using interdisciplinary approaches HCI engages with the complexities and messiness of real world design spaces to provide
novel perspectives and new ways of addressing the challenge of dementia and multi stakeholder needs HCI and Design in the
Context of Dementia brings together the work of international experts designers and researchers working across disciplines
It provides methodologies methods and frameworks approaches to participatory engagement and case studies showing how
technology can impact the lives of people living with dementia and those around them It includes examples of how to conduct
dementia research and design in context in the field of HCI ethically and effectively and how these issues transcend the
design space of dementia to inform HCI design and technology development more broadly The book is valuable for and aimed
at designers researchers scholars and caregivers that work with vulnerable groups like people with dementia and those
