The volume takes a practical approach with case histories covering a broad range of clinical presentations and treatments all incorporating a patient centric perspective that acknowledges the longer patient journey. This must have textbook will not only arm readers with technical knowledge and expertise but also with the non technical principles of the profession developing future paramedics who are able to provide a safe and effective management plan in the out of hospital environment. Aligned to UK paramedicine curricula. More than 40 detailed case studies covering essential pathologies most commonly seen by UK paramedics as well as less typical scenarios. Evidence based clinical decision making models to support paramedics in practice. Essential physiological concepts to help readers bridge the gap from principles to practice. Focus on the wellbeing of both the patient and the paramedic. Useful appendices including medications commonly encountered in paramedic settings.

Pre-hospital Obstetric Emergency Training Advanced Life Support Group (ALSG), 2009-10-30. The Pre hospital Obstetric Emergency Training POET programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy including interpretation of patient held records and rapid assessment of the obstetric patient. It includes clear definitions and describes risk factors, diagnosis and pre hospital management of significant problems that occur in both early and late pregnancy and the immediate postnatal period. These are all situations that the pre hospital practitioner may attend. This text and the accompanying integrated on line and hands on course will help practitioners identify and manage a range of time critical obstetric emergencies specifically in the pre hospital setting and provides a structured examination and assessment technique as an aid to determining what treatment should be provided before transport as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff, doctors and nurses working in the emergency pre hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.

Law and Ethics for Paramedics Georgette Eaton, 2022-04-01.
