critical factors bearing on military operations time is defining The MCPP helps Marines win the time fight through a promotion of intuitive understanding commander s intent and the use of task and purpose when operating inside an established paradigm Another time aid is the center of gravity techniques used to determine which of the actions that address a problem set will be decisive These visions of decisiveness inform the convergence of combat power through main and supporting efforts and resource priorities The publication focuses primarily on commanders with staffs however any Marine required to plan operations should know the planning process well enough to determine the problem envision a desired state and develop options for achieving that state This publication supersedes MCWP 5 10 Marine Corps Planning Process dated 24 August 2010 MCWP 5 10 implements North Atlantic Treaty Organization NATO Standardization Agreement STANAG 2014 NATO Formats for Orders and Designation of Timing Locations and Boundaries

Appendix J and K to Marine Corps Warfighting Publications 5-1(MCWP 5-1), Marine Corps Planning Process (MCPP) the Accelerated Marine Corps Planning Process (AMCPP) and Rehearsal Types, Techniques, and Considerations ,2002 The Marine Corps Warfighting Publication 5 1 MCWP 5 1 was published in January 2000 and is the principle planning manual in the Marine Corps However the new process is directed at too high of a level to be the principle planning doctrine for the lower level units Therefore I have

developed two appendices to the MCWP 5 1 to improve the document s relevance to the regimental and battalion level The two appendices are The Accelerated Marine Corps Planning Process AMCPP and Rehearsal Types Techniques and Considerations The AMCPP is a technique for scaling MCPP to operationally realistic time constraints However it is not just doing MCPP fast The AMCPP hinges on the commander with the advice of his staff making a decision very early in the process then improving the decision with the remainder of the process The end result is a solid and flexible plan that can be executed rapidly At the regimental and battalion level rehearsals are the key to achieving an implicit understanding of the plan and improving the probability for success However this portion of the planning process is often squandered due to poor rehearsal technique or failure to target the rehearsal to the appropriate audience Therefore this appendix offers several rehearsal techniques and planning considerations that if adopted will enhance the doctrinal instructions in this area

Concepts and Issues , *U.S. Marines and Irregular Warfare* Nicholas J. Schlosser, 2015 U S Marines in Irregular Warfare Training and Education is a brief history that recounts how the U S Marine Corps adapted to fight the Global War on Terrorism during 2000 10 The Marine Corps has a long history of fighting irregular wars including the Banana Wars in Central America during the 1920s and the Vietnam War during the 1960s To battle the insurgencies in Iraq and Afghanistan the Corps drew upon this experience while also implementing new plans and programs to better prepare Marines to carry out counterinsurgency operations The Marine Corps updated the curriculum at the Command and Staff College and transformed the annual Combined Arms Exercise into Exercise Mojave Viper an immersive training program that simulated the urban environments in which Marines would be operating in Southwest Asia Most importantly Marines adjusted in the field as battalion and company commanders drew on their basic training and education to devise innovative tactics to better combat the new threats they now faced as this story shows the Marine Corps did not undergo a radical transformation to fight in Iraq and Afghanistan but instead drew on principles that had defined it as a warfighting organization throughout most of its history
