

As part of CIE's continual commitment to maintaining best practice in assessment, CIE has begun to use different variants of some question papers for our most popular assessments with extremely large and widespread candidature. The question papers are closely related and the relationships between them have been thoroughly established using our assessment expertise. All versions of the paper give assessment of equal standard.

The content assessed by the examination papers and the type of questions are unchanged.

This change means that for this component there are now two variant Question Papers, Mark Schemes and Principal Examiner's Reports where previously there was only one. For any individual country, it is intended that only one variant is used. This document contains both variants which will give all Centres access to even more past examination material than is usually the case.

The diagram shows the relationship between the Question Papers, Mark Schemes and Principal Examiner's Reports.

impacting ownership and use of these marks also addressed are their historical development registration and protection certifiers liability legal and commercial significance use in regulatory and technical standardization frameworks and emergent sui generis forms of certification namely ecolabels and electronic authentication marks in digital content This publication is especially timely in light of the advent of the EU certification mark and the controversial EU proposals to extend the Geographical Indications system to include non agri food products **Climate Change Law in China in Global Context** Xiangbai He,Hao Zhang,Alexander Zahar,2020-05-31 In Climate Change Law in China in Global Context seven climate change law scholars explain how the country s legal system is gradually being mobilized to support the reduction of greenhouse gas emissions in China and achieve adaptation to climate change There has been little English scholarship on the legal regime for climate change in China This volume addresses this gap in the literature and focuses on recent attempts by the country to build defences against the impacts of climate change and to meet the country s international obligations on mitigation The authors are not only interested in China s laws on paper rather the book explains how these laws are implemented and integrated in practice and sheds light on China s current laws laws in preparation the changing standing of law relative to policy and the further reforms that will be necessary in response to the 2015 Paris Agreement on Climate Change This comprehensive and critical account of the Chinese legal system s response to the pressures of climate change will be an important resource for scholars of international law environmental law and Chinese law **Intercultural Philosophy and Environmental Justice Between Generations** Hiroshi Abe,Matthias Fritsch,Mario Wenning,2024-03-13 This anthology combines an intercultural approach with intergenerational ethics to address critical environmental challenges Written by scholars from all over the world including Canada the US New Zealand Nigeria Ethiopia Japan the UK China and Spain this book offers new perspectives on how to foster sustainable societal practises that draw on the past and are fair to future generations It introduces the M ori idea that views all things and human generations in layered relations Indigenous accounts of spiralling time and reciprocities among ancestors and descendants the philosophical dimensions of Chinese conceptions of ancestor spirits and future ghosts and African accounts of anamnestic solidarity among generations These ideas influence proposals for how to confront ending worlds and address the environmental future of humanity making this book a valuable resource for scholars and students of environmental law and policy environmental humanities political science and intercultural and comparative philosophy as well as policymakers **Third-Party Certifiers** Jan De Bruyne,2019-07-12 Third Party Certifiers Jan De Bruyne Third party certifiers are organisations that are independent a requesting entity They attest that a product service information or person possesses certain qualifications or meets safety quality or technical standards This important book presents an in depth analysis of the liability and obligations of certifiers evaluates existing certification processes in selected fields and proposes new mechanisms which could increase the accuracy and reliability of certifiers ratings marks or reports Highlighting the risks of errors in this activity inaccurate certification

was a major factor in the global financial crisis of 2008 the author takes a comparative approach looking at the certification process in several European countries Australia and the United States Such aspects of the process as the following are thoroughly described obligations and liability of certifiers during the certification process risk of information asymmetry between the requesting entity and the end user and relationship between the civil liability of certifiers and public law aspects The analysis includes detailed research on key industries and jurisdictions and a specific proposed framework for more accurate and reliable certification Because the efficient and effective functioning of third party certifiers is extremely important in today s world especially in such areas as health the environment safety or economic values this deeply researched contribution to an important area of commercial law combining analysis of current issues with proposed reforms will be welcomed by practitioners when confronted with legal issues with regard to the certification process The book s conceptual framework will also prove highly useful for policymakers charged with developing reliable certification mechanisms
