The Next Generation of STEM Teachers Patrick M. Jenlink, Karen Embry Jenlink, 2019-04-13 STEM Teaching An Interdisciplinary Approach breaks from the more historical idea of making knowledge within disciplines and

seeks to engage the reader in a growing conversation that is gaining momentum and is focused on an interdisciplinarity of STEM education which seeks to embrace and or present emerging perspectives on the standards. Importantly the conversation on STEM education and interdisciplinary approaches to teacher preparation may draw into specific relief the respective professional and or disciplinary standards for each of the four STEM disciplines as each relates to fostering an interdisciplinary approach. The importance and relevance of this interdisciplinary perspective to teacher preparation lies in the realization that STEM literacy moves into everyday lives and thinking and not just in STEM related disciplines. This means that faculty in teacher preparation need to extend the range of STEM literacy in pedagogical strategies so that STEM teaching is enriched with multimodal literacies into teaching and learning which in turn makes STEM knowledge more relevant and engaging for its manifest connections to solving the problems that challenge society. *Rescue* Ian Goldin, 2021-05-13. Ian Goldin, Professor of Development and Globalisation at the University of Oxford, provides an urgently needed roadmap that reveals how the pandemic could lead to a better world from globalisation to the future of jobs, income inequality and climate change. *Rescue* is a bold call for an optimistic future and one we all have the power to create.
