Law in India offers the most comprehensive coverage of the diverse and complex discipline of environmental and natural resources law in India over the past fifty years. With forty-two contributions from law and non-law scholars, the Handbook presents diverse perspectives on several areas including biodiversity, climate change, water, forests, agriculture, health, resource extraction, and industrial development. By departing from the existing approach that examines natural resources law and environmental law separately, The Oxford Handbook of Environmental and Natural Resources Law in India offers a much needed integrated analysis of the development of domestic jurisprudence vis-à-vis the environment and natural resources.

E-Governance for Smart Cities T. M. Vinod Kumar, 2014-11-26. This book highlights the electronic governance in a smart city through case studies of cities located in many countries. E-Government refers to the use by government agencies of information technologies such as Wide Area Networks, the Internet, and mobile computing that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts: E-Governance, State of the Art Studies of many cities, E-Governance Domains, Studies, E-Governance Tools and Issues. *Indian Books in Print*, 2003. *Bibliographic Guide to Government Publications 2001* GK Hall, Thomson Gale, 2002-08. **Indian Book Industry**, 1991. **The Criminal Law Journal**, 1983.
