Essays In Siswati:

An Introduction to the Literature of eSwatini Kerry Vincent, 2020-10-21 This book is the first comprehensive introduction to the literature of eSwatini. It details a literary trajectory that begins with renditions of the country by early travelers and settlers and follows with the emergence of a national literature that is marked by early oral influences and molded by unique sociopolitical interests. Along the way, the author considers how contemporary writing by visitors, expatriates, and journalists have salvaged and recycled earlier images and attitudes through a series of representational and rhetorical practices. In particular, the lingering influence of colonial discourse is explored in the context of the nation's pivotal incwala ritual. A chapter on Hilda Kuper that situates her fiction and drama between outsider and insider accounts is followed by the final two chapters that trace the development of anglophone and siSwati writing and identify themes arising from the major literary genres produced by local authors. The concluding section features a comprehensive registry of writers with brief summaries of their works.

Africa's Endangered Languages Jason Kandybowicz, Harold Torrence, 2017-07-10 Relatively little is known about Africa's endangered languages Unlike indigenous languages in Australia North Asia and the Americas which are predominantly threatened by colonizers African languages are threatened most immediately by other local languages As a result the threat of language extinction is perceived as lower in Africa than in other parts of the globe and a disproportionate amount of research is devoted to the study of endangered African languages when compared to any other linguistically threatened region in the world There are approximately 308 highly endangered languages spoken in Africa roughly 12% of all African languages and at least 201 extinct African languages This volume hopes to illuminate and challenge this trend Chapters offer both documentary and theoretical perspectives emphasizing the symbiotic relationship between the two approaches and its implications for the preservation of endangered languages both in the African context and more broadly Documentary oriented chapters deal with key issues in African language documentation including language preservation and revitalization community activism and data collection and dissemination methodologies among others Theoretically oriented chapters provide detailed descriptions and analyses of phonetic phonological morphological syntactic and semantic phenomena and connect these to current theoretical issues and debates Africa's Endangered Languages provides thorough coverage of a continent's neglected languages that will spur linguists and Africanists alike to work to protect them
