SAGE Handbook of Research on Classroom Assessment James H. McMillan, 2013 The Sage Handbook of Research on Classroom Assessment provides scholars professors graduate students and other researchers and policy makers in the organizations agencies testing companies and school districts with a comprehensive source of research on all aspects of K 12 classroom assessment The handbook emphasizes theory conceptual frameworks and all varieties of research quantitative qualitative mixed methods to provide an in depth understanding of the knowledge base in each area of classroom assessment and how to conduct inquiry in the area It presents classroom assessment research to convey in depth the state of knowledge and understanding that is represented by the research with particular emphasis on how classroom assessment practices affect student achievement and teacher behavior Editor James H McMillan and five Associate Editors bring the best thinking and analysis from leading classroom assessment researchers on the nature of the research making significant contributions to this prominent and hotly debated topic in education The Testing Charade Daniel Koretz, 2017-08-31 For decades we've been studying experimenting with and wrangling over different approaches to improving public education and there's still little consensus on what works and what to do The one thing people seem to agree on however is that schools need to be held accountable we need to know whether what they're doing is actually working But what does that mean in practice High stakes tests Lots of them And that has become a major problem Daniel Koretz one of the nation's foremost experts on educational testing argues in The Testing Charade that the whole idea of test based accountability has failed it has increasingly become an end in itself harming students and corrupting the very ideals of teaching In this powerful polemic built on unimpeachable evidence and rooted in decades of experience with educational testing Koretz calls out high stakes testing as a sham a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement Rather than setting up incentives to divert instructional time to pointless test prep he argues we need to measure what matters and measure it in multiple ways not just via standardized tests Right now we're lying to ourselves about whether our children are learning And the longer we accept that lie the more damage we do It's time to end our blind reliance on high stakes tests With The Testing Charade Daniel Koretz insists that we face the facts and change course and he gives us a blueprint for doing better **The Monday Report** Florida. Grading Education Richard Rothstein, 2008-12-14 Yes we should hold public schools accountable for effectively spending the vast funds with which they have been entrusted But accountability policies like No Child Left Behind based exclusively on math and reading test scores have narrowed the curriculum misidentified both failing and successful schools and established irresponsible expectations for what schools can accomplish Instead of just grading progress in one or two narrow subjects we should hold schools accountable for the broad outcomes we expect from public education basic knowledge and skills critical thinking an appreciation of the arts physical and emotional health and preparation for skilled employment and then develop

the means to measure and ensure schools success in achieving them Grading Education describes a new kind of accountability plan for public education one that relies on higher quality testing focuses on professional evaluation and builds on capacities we already possess This important resource Describes the design of an alternative accountability system that would not corrupt education as does NCLB and its state testing systems Explains the original design of NAEP in the 1960s and shows why it should be revived Defines the broad goals of education beyond math and reading test scores and reports on surveys to confirm public and governmental support for such goals Relates these broad goals of education to the desire for accountability in education **The FairTest Examiner** ,1999 *Children's Books in Print*, 2007 ,2006 Fostering Change in Institutions, Environments, and People David C. Berliner,Haggai Kupermintz,2014-04-08 This volume is comprised of contributions from leading scholars in education and psychology In part one of the book the authors provide insight into the psychology of change examining What factors work as catalysts for change in environments institutions and people What factors hinder change When change is deemed beneficial In the second part of this volume the authors turn their attention to the issue of peace education They examine the types of problems that societies and scholars should identify and try to solve in hopes of building more peaceful environments The final chapter is a biography honoring Professor Gavriel Gabi Salomon a significant contributor to the vast literature on change This book is appropriate reading for professors students and academics who are dedicated to fostering change to benefit institutions environments and people **El-Hi Textbooks & Serials in Print**, 2005 ,2005 **The Case for District-based Reform** Jonathan A.
