Jerry Brotton reveals why Hebrew culture privileges east why Renaissance Europeans began drawing north at the top of their maps why early Islam revered the south why the Aztecs used five color coded cardinal directions and why no societies primitive or modern have ever orientated themselves westwards In doing so politically loaded but widely used terms such as the Middle East the Global South the West Indies the Orient and even the western world take on new meanings Who decided on these terms and what do they mean for geopolitics How have directions like east and west taken on the status of cultural identities or more accurately stereotypes Yet today because of GPS capability cardinal points are less relevant Online we place ourselves at the center of the map as little blue dots moving across geospatial apps we have become the most important compass point though in the process we've disconnected ourselves from the natural world Imagining what future changes technology may impose Jerry Brotton skillfully reminds us how crucial the four cardinal directions have been to everyone who has ever walked our planet For anyone interested in history geography or surprising new ways to think about the world at large Four Points of the Compass will be a stimulating experience **English Texts & Contexts 2 F.**
