Levitt And Stephen J. Dubner](#) Shortcut Edition,2021-05-30 Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes By reading this summary you will discover through concrete examples an innovative way of looking at the world Why do dealers live with their parents How can information be used to dismantle a terrorist group By answering these unusual questions the authors of *Freakonomics* bring to the forefront the little known workings of the economy You will also discover that Incentives are at the root of many human behaviors Popular wisdom is often mistaken Behind great consequences are sometimes hidden distant causes Information is exploited by experts for their own profit Determining what needs to be measured to conduct a study is fundamental The authors of *Freakonomics* Steven Levitt and Stephen Dubner are Harvard economist and New York Times Magazine writer respectively They are the inventors of the eponymous science of exploring societal issues using the tools of economics You will learn how the tools of economics can be exploited to answer unusual and interesting questions Buy now the summary of this book for the modest price of a cup of coffee *Freakonomics* ,2010 Economics is not widely considered to be one of the sexier sciences The annual Nobel Prize winner in that field never receives as much publicity as his or her compatriots in peace literature or physics But if such slights are based on the notion

that economics is dull or that economists are concerned only with finance itself Steven D Levitt will change some minds In Freakonomics written with Stephen J Dubner Levitt argues that many apparent mysteries of everyday life don t need to be so mysterious they could be illuminated and made even more fascinating by asking the right questions and drawing connections For example Levitt traces the drop in violent crime rates to a drop in violent criminals and digging further to the Roe v Wade decision that preempted the existence of some people who would be born to poverty and hardship Elsewhere by analyzing data gathered from inner city Chicago drug dealing gangs Levitt outlines a corporate structure much like McDonald s where the top bosses make great money while scores of underlings make something below minimum wage And in a section that may alarm or relieve worried parents Levitt argues that parenting methods don t really matter much and that a backyard swimming pool is much more dangerous than a gun These enlightening chapters are separated by effusive passages from Dubner s 2003 profile of Levitt in The New York Times Magazine which led to the book being written In a book filled with bold logic such back patting veers Freakonomics however briefly away from what Levitt actually has to say Although maybe there s a good economic reason for that too and we re just not getting it yet
