Succinct stand alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of case studies written for early childhood elementary middle and secondary classrooms providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity emphasizing how psychological factors adapt and change based on external influences such as sex gender race language disability status and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules and expanded coverage of diversity in new diversity related research. This title is accompanied by a complete teaching and learning package.
