## **Growth And Development Assessment Paper:**

Development Planning in South Africa John Reynolds, 2018-06-15 Celebrated as a beacon of democracy and reconciliation many people in South Africa continue to live in severe poverty particularly in the Eastern Cape Province Backed by the United Nations Development Programme the Eastern Cape s provincial government consequently launched an historically ambitious programme the Provincial Growth and Development Plan aimed at tackling the province s poverty unemployment and inequality over a ten year period in a radical policy overhaul Drawing on the author s first hand engagement with the planning process Development Planning in South Africa is an empirically rich study that utilises a strategic relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state The first work of its kind the book provides an indispensable micro level study with profound implications for how state power is understood to be organised and expressed in state policy Relevant beyond South Africa to policy implementation in both developing and developed states globally the book is essential reading for students and scholars of government studies political economy development policy studies and social movements

**The World Bank's Country Policy and Institutional Assessment** The World Bank, 2010-09-13 The evaluation finds that the content of the World Bank s Country Policy and Institutional Assessment CPIA is largely relevant for growth and poverty reduction in the sense that it maps well with the determinants of growth and poverty reduction identified in the economics literature However some CPIA criteria need to be revised in particular trade and finance and one needs to be added assessment of disadvantaged socio economic groups Second the evaluation finds that the CPIA ratings are in general reliable and correlate well with similar indicators The World Bank s internal review process helps guard against potential biases in having Bank staff rate countries on which their work programs depend The CPIA ratings are found to correlate better with similar indicators for middle income countries than for low income countries This could be because there is more information available on middle income countries which increases the likelihood of different institutions having similar assessments on them This could also be because the CPIA rating exercise takes into account the stage of development which is more pertinent for low income countries and which also subject the ratings of those countries to more judgment in an exercise that is already centered on staff judgment

**Growth and Productivity in Agriculture and Agribusiness** ,2011 The report assesses the World Bank Group s support for growth and productivity in the agriculture sector Enhancing agricultural growth and productivity is essential to meeting the worldwide demand for food and to reducing poverty particularly in the poorest developing countries Between 1998 and 2008 the period covered by this evaluation the World Bank Group WBG provided 23 7 billion in financing for agriculture and agribusiness in 108 countries roughly 8 percent of total WBG financing spanning areas from irrigation and marketing to research and extension However this was a time of declining focus on agricultural growth and productivity by both countries and donors The cost of inadequate attention to agriculture especially in agriculture based economies came into focus with the food crisis of 2007 08 The crisis added momentum to an emerging renewal of attention and stepped up financing to agriculture and agribusiness at the World Bank and International Finance Corporation IFC as well as at several multilateral and bilateral agencies World Bank financing rose two and a half times from 2008 to 2009 though that increase in lending seems to have been accompanied by a decline in analytical work which this review finds valuable for results This evaluation seeks to provide lessons from successes and failures to help improve the development impact of the renewed attention to the sector Ratings against the World Bank s stated objectives and IFC s market based benchmarks for agriculture and agribusiness projects have been equal to or above portfolio averages in East Asia Latin America and the transition economies in Europe with notable successes over a long period in China and India But performance of WBG

interventions has been well below average in Sub Saharan Africa where IFC has had little engagement in agribusiness. Inconsistent client commitment and weak capacity have limited the effectiveness of WBG support in agriculture based economies particularly in Sub Saharan Africa and constraints on staffing and internal coordination within the WBG have also hurt outcomes. Financial sustainability has been constrained by insufficient government funding and the difficulty of maintaining agricultural services and infrastructure. The WBG has a unique opportunity to match the increases in the financing for agriculture with sharper focus on improving agricultural growth and productivity in agriculture based economies notably in Sub Saharan Africa. Greater effort will be needed to connect sectoral interventions and achieve synergies from public and private sector interventions to build capacity and knowledge exchange to take stock of experience in rain fed agriculture to ensure attention to financial sustainability and to cross cutting issues of gender environmental and social impacts and climate and to better integrate WBG support at the global and regional levels with that at the country level.
