Holt Environmental Science Water Use And Management:

Physical-Chemical Treatment of Water and Wastewater A. P. Sincero, G. A. Sincero, 2002-07-31 The books currently available on this subject contain some elements of physical chemical treatment of water and wastewater but fall short of giving comprehensive and authoritative coverage They contain some equations that are not substantiated offering empirical data based on assumptions that are therefore difficult to comprehend This text brings together the information previously scattered in several books and adds the knowledge from the author's lectures on wastewater engineering Physical Chemical Treatment of Water and Wastewater is not only descriptive but is also analytical in nature The work covers the physical unit operations and unit processes utilized in the treatment of water and wastewater Its organization is designed to match the major processes and its approach is mathematical The authors stress the description and derivation of processes and process parameters in mathematical terms which can then be generalized into diverse empirical situations Each chapter includes design equations definitions of symbols a glossary of terms and worked examples One author is an environmental engineer and a professor for over 12 years and the other has been in the practice of environmental engineering for more than 20 years They offer a sound analytical mathematical foundation and description of processes Physical Chemical Treatment of Water and Wastewater fills a niche as the only dedicated textbook in the area of physical and chemical methods providing an analytical approach applicable to a range of empirical situations Contents Introduction Characteristics of Water and Wastewater Quantity of Water and Wastewater Constituents of Water and Wastewater Unit Operations of Water and Wastewater Treatment Flow Measurements and Flow and Quality Equalizations Pumping Screening Settling and Flotation Mixing and Flocculation Conventional Filtration Advanced Filtration and Carbon Adsorption Aeration Absorption and Stripping Unit Processes of Water and Wastewater Treatment Water Softening Water Stabilization Coagulation Removal of Iron and Manganese by Chemical Precipitation Removal of Phosphorus by Chemical Precipitation Removal of Nitrogen by Nitrification Denitrification Ion Exchange Disinfection

Co-Engineering and Participatory Water Management

Katherine A. Daniell, 2012-05-31 Effective participatory water management requires effective co engineering the collective process whereby organisational decisions are made on how to bring stakeholders together This trans disciplinary book highlights the challenges involved in the collective initiation design implementation and evaluation of water planning and management processes It demonstrates how successful management requires the effective handling of two participatory processes the stakeholder water management process and the co engineering process required to organise this The book provides practical methods for supporting improved participatory processes including the application of theory and models to aid decision making International case studies of these applications from Australia Europe and all over the world including Africa are used to examine negotiations and leadership approaches and their effects on the participatory stakeholder processes This international review of participatory water governance forms an important resource for academic researchers

in hydrology environmental management and water policy and also practitioners and policy makers working in water management
