Latest Engineering Learnership 2014 And 2015:

Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g. Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries

Educating Engineers for Future Industrial Revolutions Michael E. Auer, Tiia Rüttemann, 2021-03-13 This book contains papers in the fields of engineering pedagogy education public private partnership and entrepreneurship education research in engineering pedagogy evaluation and outcomes assessment Internet of Things online laboratories IT knowledge management in education and real world experiences We are currently witnessing a significant transformation in the development of education and especially post secondary education To face these challenges higher education has to find innovative ways to quickly respond to these new needs There is also pressure by the new situation in regard to the Covid pandemic These were the aims connected with the 23rd International Conference on Interactive Collaborative Learning ICL2020 which was held online by University of Technology Tallinn Estonia from 23 to 25 September 2020 Since its beginning in 1998 this conference is devoted to new approaches in learning with a focus on collaborative learning Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy In this way we try to bridge the gap between pure scientific research and the everyday work of educators Interested readership includes policymakers academics educators researchers in pedagogy and learning theory school teachers learning industry further and continuing education lecturers etc

Encyclopedia of Professionalization Didier Demaziere, Richard Wittorski, 2024-10-30 Professionalization has become a given in the worlds of work and education For a wide variety of professions public and private organizations and training and further education courses professionalization is an inescapable reality However it takes on diverse even contradictory meanings according to what it represents a managerial imperative

imposed by public or managerial policies or a set of goals defined by an ideal of service or quality of work. The purpose of Encyclopedia of Professionalization is to discuss the current challenges facing professionalization and by exploring major research traditions to clarify the meanings associated with this concept and the various phenomena it encompasses. Three major notions of professionalization are examined: the manufacturing of professions in pursuit of autonomy, the rise of professionalisms embodying notions of a job well done, and the construction of renewed professionalities at the very heart of work situations and training systems.

Contemporary Apprenticeship Reforms and Reconfigurations Thomas Deiſinger, Ursel Hauschildt, Philipp Gonon, 2019. INAP, the International Network on Innovative Apprenticeship, has steadily grown to incorporate researchers from all over the world. In 2019, its 8th international conference, hosted by Konstanz University, Germany, points to various issues linked to contemporary apprenticeship reforms and reconfigurations, which indicates the need for apprenticeships to deliver on its promise of workplace skills and for it to evolve and also to change as the world economies develop. Apprenticeship is a model of work and training which has benefits for many different types of economies and societies. Specific areas of research are represented in Konstanz by the following topics and from different countries' perspectives: Governance and Stakeholders; Teaching and Learning; Academisation in Apprenticeships; Diversity and Inclusiveness; Internationalisation and Transfer of VET Services; Future Work; New Employment Patterns; Future Work Industry 4.0; School to Work Transition; and Youth Employment. Modern Fields of TVET Research and Practice.

A Critical Analysis of National Apprenticeship Training Scheme (NATS) and Its Employability on Technical Graduates: A Case Study of the Eastern Region. DR. S.M. EJAZ AHMAD, 2024-12-17. Human resource development policies place a strong emphasis on training and skill improvement. The scale of India's present technical training infrastructure is less than what is needed. There is also a sizable skill gap between what the market requires in terms of skills and what graduate and diploma programs have to offer. Not only is it difficult to establish a significant quantitative expansion of skill training facilities, but it is also difficult to improve their quality, which is a work that is just as significant. The institutional level's capacity for educational and training programs is insufficient to meet the rising demand for the necessary skill sets, knowledge, and experience. Apprenticeships have great promise in fostering our youths, starting at the school level, especially with several industries experiencing significant skills deficits in the future. The National Apprenticeship Training Scheme (NATS) in India, which promotes learning by earning and learning by doing, is a potent tool for skill development. Important changes have been made to The Apprentices Act, 1961, to help freshly graduated students who are joining the workforce receive industrial training and exposure to contemporary industrial procedures. The BOAT Boards of Apprenticeship Training, situated in Mumbai, Kanpur, Chennai, and the BOPT Board of Practical Training, headquartered in Kolkata, are the four independent regional organizations through which the Ministry of Education (MoE) implements the program. Despite its significance and the crucial role that skill development plays in the economy, it has been discovered that the topic has not

recently been investigated Therefore it was crucial to investigate the facts of the apprentices job and training experiences and the business community s opinions regarding NATS and the subject matter of such a scheme Additionally it will assist policymakers academicians and industrialists in comprehending the gaps and choosing their future course of action A CRITICAL ANALYSIS OF THE NATIONAL APPRENTICESHIP TRAINING SCHEME NATS ON EMPLOYABILITY OF TECHNICAL GRADUATES A CASE STUDY OF THE EASTERN REGION has been published The report includes data from numerous stakeholders as well The main areas of focus for the investigation were skill and employability development the role of industries in closing trainees skill gaps the level of awareness about NATS amongst the passing graduates and successful industry institute collaboration through set schedules targeted group discussions and spontaneous dialogues

Handbook of Education in China W.
