

DRAW A BIRD IN SIX STEPS

Start with the big picture. Posture, proportion, and angles create the silhouette of the bird. Dark and light values convey its solidity and lighting conditions. Add a little detail at the end, and stop before you overwork it.

1 As you look at the bird, try to feel the life within it. Try to capture its posture and flow with a single line. Block in the proportions of the body, and then the head. Double-check to make sure the proportions are correct before moving on. Carve in the angles, paying particular attention to where the head and tail join the body. You are not committed to these early marks. They serve as your guides.

2 Lightly draw the form of the bird, showing the major feather groups.

3 Block in the major areas of dark and light values. Lighting, color, and pattern all cause value changes.

5 Add details. Accent areas of interest and accentuate the edges. A little goes a long way, so practice restraint.

6 Knowing when to stop drawing is important. As a general rule, stop drawing before the picture is done. It is better for a drawing to be underdeveloped than overworked.

4 If you are working with color, maintain the values you observed in step 3. Remember that in some light, a red bird will not appear red. Add the color you see, not what you think it should be.
