10. What percentage of respondents in groups A and B had the correct answer? The correct answer is 50%.

- The authors are grateful to Dr. A. R. Shcherbakov for his help during the experiments.

These data were used to develop a model to predict the probability of a person being a victim of a violent crime. The model was developed using a logistic regression analysis. The model was then used to predict the probability of a person being a victim of a violent crime based on their demographic characteristics. The model was found to be a good predictor of the probability of a person being a victim of a violent crime.
