Speaking of Buildings Naomi Stead, Janina Gosseye, Deborah van der Plaats, 2019-10-15 By and large architectural historians use texts drawings and photographs to craft their narratives Oral testimony from those who actually occupy or construct buildings is rarely taken as seriously Speaking of Buildings offers a rebuttal theorizing the radical potential of a methodology that has historically been cast as unreliable Essays by an international group of scholars look at varied topics from the role of gossip in undermining masculine narratives in architecture to workers accounts of building with cement in midcentury London to a sound art piece created by oral testimonies from Los Angeles public housing residents In sum the authors call for a renewed form of listening to enrich our understanding of what buildings are what they do and what they mean to people *The Domestic and the Foreign in Architecture* Ruth Baumeister, Sang Lee, 2007 For centuries across nations dialogue between the domestic and the foreign has affected and transformed architecture Today these dialogues have become highly intensified The Domestic and the Foreign in Architecture examines how these exchanges manifest themselves in contemporary architecture in terms of its aesthetic potential and its practice which in turn are impacted by broad economic cultural and political issues This book traces how diverse cultural encounters inevitably modify conventional categories standards and codes of architecture such as domestic identity its political and economic representations and the negotiations with what is deemed foreign Theoretical reflections by distinguished scholars are accompanied by interviews with some of the most influential architects practicing today as well as stunning visual presentations by professional photographers **Open Architecture** Esra Akcan, 2018-04-09 Toward an open architecture the International Building Exhibition in Berlin **Psychoanalysis and Architecture** Cosimo Schinaia, 2018-05-08 This book explores how

psychoanalysis and architecture can enhance and increase the chances of mental containment while also fostering exchange between inside and outside. The way in which psychoanalysts take care of mental suffering and the way in which architects and city planners assess the environment are grounded in a shared concern with the notion of dwelling. It is a matter of fact that dwelling exists in a complex context comprised of both biological need and symbolic function. Psychoanalysis and architecture can work together in both thinking about and designing not only our homes but also the analyst's consulting rooms and more generally our therapy places. However, this is possible only if they renounce the current limited and restrictive model of this interaction and propose one more that is more in harmony with the questions and situations that clients themselves pose.

Sacred Liturgy Dom Alcuin Reid, 2014-05-04. The Sacred Liturgy is not a hobby for specialists. It is central to all our endeavors as disciples of Jesus Christ. This profound reality cannot be over-emphasized. We must recognize the primacy of grace in our Christian life and work and we must respect the reality that in this life the optimal encounter with Christ is in the Sacred Liturgy. With these words Bishop Dominique Rey of Frjus Toulon France opened Sacra Liturgia 2013, an international conference in which he brought together over twenty leading liturgists, cardinals, bishops, and other scholars from around the world to emphasize the centrality of liturgical formation and celebration in the life and mission of the Church. The New Evangelization must be founded on the faithful and fruitful celebration of the Sacred Liturgy as given to us by the Church in her tradition. Western and Eastern. Bishop Rey asserted. Sacra Liturgia 2013, the proceedings of which this book publishes, explored questions of liturgical art, architecture, music, the *ars celebrandi*, the importance of ritual in human psychology, truly pastoral liturgy, the place of the older liturgical rites in the New Evangelization, liturgical formation, liturgical law, the role of the diocesan bishop in respect of the liturgy, and more. Sacred Liturgy: The Source and Summit of the Life and Mission of the Church is an important resource in ongoing liturgical formation for clergy, religious, and laity and makes a significant contribution to that renewal promoted in the Pontificate of Benedict XVI. That is the renewal which embraces the riches of liturgical tradition as valuable treasures, seeks to read the Second Vatican Council according to a hermeneutic of continuity, not rupture, and is in no doubt that as Joseph Cardinal Ratzinger once wrote, the true celebration of the Sacred Liturgy as the center of any renewal of the Church.

Il libro raccoglie i contributi di un lavoro interdisciplinare svolto durante un BIP Blended Intensive Program finanziato dalla comunità europea. Il tema: quello dei siti industriali dismessi e tutelati per interesse storico. Partendo da un confronto tra i diversi approcci basati sullo studio delle best practices e dei diversi metodi e strumenti di analisi, sono state definite alcune premesse per la rappresentazione del sito e lo sviluppo di ipotesi di trasformazione per il riuso dell'ex Corradini a S. Giovanni. Stimolare il dibattito culturale, confrontarsi con realtà culturali diverse, definire percorsi metodologici replicabili sono gli obiettivi principali di questo lavoro. English. The Architecture of Modern Italy Terry Kirk, 2005-06-02

Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter s all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself

Street office done by Scott Brandi who also designed the book It ends with 27 interviews of prominent members of the Institute who comment on it and their experiences The book should appeal to architecture students and those interested in architecture and urbanism of the seventies when the government in the United States was more reasonable in economic and political equity

Architecture in Motion Robert Kronenburg, 2013-08-15 The idea that architecture can be portable is one that grabs the imagination of both designers and the people who use it perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society while at the same time dealing with issues of practicality economy and sustainability Architecture in Motion examines the development of portable transportable demountable and temporary architecture from prehistory to the present day From familiar vernacular models such as the tent mobile home and houseboat to ambitious developments in military and construction engineering all aspects of portable building are considered Building on his earlier works Portable Architecture and Houses in Motion Robert Kronenburg compares traditional forms of building current commercial products and the work of innovative designers and examines key contemporary portable buildings to reveal surprising exciting and imaginative examples He explores the philosophical and technological issues raised by these experimental and futuristic prototypes By understanding the nature of transitory architecture a new ecologically aware design strategy can be developed to prioritise buildings that tread lightly on the earth and still convey the sense of identity and community necessary for an established responsible society This book provides a unique insight into this pivotal field of design
