Mark Scheme Accounting Winter 2000 Paper :

Discrimination, Vulnerable Consumers and Financial Inclusion Cătălin-Gabriel Stănescu, Asress Adimi Gikay, 2020-12-28

This book addresses the questions of discrimination vulnerable consumers and financial inclusion in the light of the emerging legal socioeconomic and technological challenges New technologies such as artificial intelligence driven consumer credit risk assessment and Fintech platforms the changing nature of vulnerability due to the ongoing COVID 19 pandemic as well as the sophistication of digital technologies which help circumvent legal barriers and protections necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges Organized in two major parts the first addresses from multiple national angles the idea of a human rights approach to consumer law in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from

discrimination and from debt induced servitude The second tackles the challenges posed by increased usage of technology in connection with financial services which tends to solve but also creates additional issues for consumers in general and for vulnerable groups in particular Too Much Is Not Enough Robert W. Kolb, 2012-08-23 The scholarly literature on executive

compensation is vast As such this literature provides an unparalleled resource for studying the interaction between the setting of incentives or the attempted setting of incentives and the behavior that is actually adduced From this literature there are several reasons for believing that one can set incentives in executive compensation with a high rate of success in guiding CEO behavior and one might expect CEO compensation to be a textbook example of the successful use of incentives Also as executive compensation has been studied intensively in the academic literature we might also expect the success of incentive compensation to be well documented Historically however this has been very far from the case In Too Much Is Not Enough Robert W Kolb studies the performance of incentives in executive compensation across many dimensions of CEO performance The book begins with an overview of incentives and unintended consequences Then it focuses on the theory of incentives as applied to compensation generally and as applied to executive compensation particularly Subsequent chapters explore different facets of executive compensation and assess the evidence on how well incentive compensation performs in each arena The book concludes with a final chapter that provides an overall assessment of the value of incentives in guiding executive behavior In it Kolb argues that incentive compensation for executives is so problematic and so prone to error that the social value of giving huge incentive compensation packages is likely to be negative on balance In focusing on incentives the book provides a much sought after resource for while there are a number of books on executive compensation none focuses specifically on incentives Given the recent fervor over executive compensation this unique but logical perspective will garner much interest And while the literature being considered and evaluated is technical the book is written in a non mathematical way accessible to any college educated reader *Parliamentary Papers* Great Britain. less common In *The Best System Money Can Buy* Carolyn M Warner systematically and often entertainingly gives the lie to these assumptions and provides a framework for understanding the persistence of corruption in the Western states of the EU In compelling case studies she shows that under certain conditions politicians and firms across Europe chose to counter the increased competition they faced due to liberal markets and political reforms by resorting to corruption More elections have made ever larger funding demands on political parties privatization has proved to be a theme park for economic crime and party profit firms and politicians collude in many areas where EU harmonization has resulted in a net reduction in law enforcement powers and state led export promotion efforts especially in the armaments infrastructure and energy sectors have virtually institutionalized bribery The assumptions that corruption and modernity are incompatible or that Western Europe is somehow immune to corruption simply do not hold as Warner conveys through colorful analyses of scandals in which large corporations politicians and bureaucrats engage in criminal activity in order to facilitate mergers and block competition and in which officials accept private payments for public services rendered At the same time the book shows the extent to which corruption is driven by the very economic and political reforms thought to decrease it **APAIS,**
