Maths 5-11 Caroline Clissold, 2019-10-23 Focusing on good progression from Reception to Year 6 Maths 5 11 provides a clear and concise presentation of the fundamental knowledge that all primary mathematics teachers need. It provides readers with practical knowledge for the planning and assessment necessary to employ the theories expressed in the book. Ranging from number sense and place value to looking in depth at the various aspects of fractions and mathematical reasoning, this book explores mathematical connections inside and outside of the curriculum, the relation of mathematics to other primary subjects such as science, geography, and art, mathematics teaching practices from high performing jurisdictions across the world, the progression of learning from primary school to secondary school, the big ideas in mathematics, and activities that provide strategies for children to use responsively and creatively. Helping primary teachers and mathematics coordinators improve and enhance their mathematical subject knowledge and pedagogy, Maths 5 11 will re-instil an excitement about teaching mathematics among its readers. The Sunflower Forest William R. Jordan,2012-02-07 Ecological restoration the attempt to guide damaged ecosystems back to a previous usually healthier or more natural condition is rapidly gaining recognition as one of the most promising approaches to conservation In this book William R Jordan III who coined the term restoration ecology and who is widely respected as an intellectual leader in the field outlines a vision for a restoration based environmentalism that has emerged from his work over twenty five years Drawing on a provocative range of thinkers from anthropologists Victor Turner Roy Rappaport and Mary Douglas to literary critics Frederick Turner Leo Marx and R W B Lewis Jordan explores the promise of restoration both as a way of reversing environmental damage and as a context for negotiating our relationship with nature Exploring restoration not only as a technology but also as an experience and a performing art Jordan claims that it is the indispensable key to conservation At the same time he argues restoration is valuable because it provides a context for confronting the most troubling aspects of our relationship with nature For this reason it offers a way past the essentially sentimental idea of nature that environmental thinkers have taken for granted since the time of Emerson and Muir
