

ERB Meeting

The Engineering Review Board meeting occurs every second week to discuss changes, blockers and dependencies for the engineering teams.

- It is **not** defined as an approval mechanism. Approvals are granted at the TSC/SC level.
- It is a method to inform wider audiences of the changes and issues happening in engineering teams.
- Different from the TSC or SC meetings, it focuses on tactical and technical activities rather than strategic direction.

The committee is made up of engineering directors, the manager of the PMO, the director, project managers, and EVP and VP of engineering.

COTS-Based Software Systems Rick Kazman, Dan Port, 2004-04-14 In the short space of about a decade Commercial Off the Shelf COTS software has evolved through being a relatively minor aspect of software development to a management endorsed silver bullet solution for software development a disruptive technology requiring people and organizations to extensively rethink their approaches to software development to an increasingly well understood software phenomenon for which effective solutions are being developed Part of this understanding has been to recognize that different COTS application sectors can be at different stages of this evolution Some sectors are just beginning to become COTS intensive Some have evolved COTS solutions that are very well matched to their problem domain Others including most large scale applications still involve their developers in rethinking how to adapt their traditional software architectures processes management practices and personnel skills to accommodate economically attractive but complex combinations of powerful but incompletely compatible and independently evolving COTS products The series of International Conferences on COTS Based Software Systems ICCBSS has been established as a continuing forum for bringing together CBSS developers suppliers and researchers to summarize and discuss progress toward understanding and resolving CBSS problems This year's conference theme Matching Solutions to Problems reflects this objective We have been fortunate to have three outstanding keynote speakers David Carr Tricia Oberndorf and Douglas Schmidt who have contributed significantly both in analyzing CBSS problems and developing better CBSS solutions The contributed papers and summaries of workshops panels and tutorials in these Proceedings give a good understanding of the nature and direction of evolution of CBSS problems and solutions As has been my experience with previous ICCBSS Proceedings volumes I believe that you will find lasting value in the content of the Proceedings
