

Flinn Advanced Inquiry Laboratory Kits for AP[®] Chemistry Correlated to the College Board Investigative Labs

In 2012, the Advanced Placement chemistry curriculum was revised to integrate inquiry, content, and reasoning through an updated set of learning objectives and science practice skills. In addition to traditional or classic lab experiments, the updated framework requires six guided-inquiry labs. Flinn has created 16 all new Advanced Inquiry Laboratory Kits that align with inquiry investigations published by the College Board. These advanced inquiry kits complement our existing student laboratory kits for AP Chemistry.

- Each Advanced Inquiry Lab Kit meets the new AP Chemistry guidelines published by the College Board.
- Each experiment has been thoroughly tested, revised, and optimized to guarantee safety and success.
- Our trademark ChemFax kit instructions always include real sample data, never made up!
- Each write-up includes AP Chemistry Review Questions that seamlessly integrate inquiry, content, and reasoning to match the "Big Ideas" in the new curriculum framework.
- Science practices are applied to connect lab experiences to the real world.

Each Advanced Inquiry Lab write-up contains valuable background information, instructions, procedures, and all the materials needed for 12 groups of students. A new, signature section in each ChemFax, called "Guided Inquiry Design and Procedure," asks leading questions to help students identify the variables for designing an effective laboratory experiment. The familiar Flinn "Teacher Notes" section wraps up the write-up with sample data, teaching tips, and summaries of possible results teachers may expect students to observe. In each Advanced Inquiry Lab, students begin with an introductory or baseline activity and then move on to the guided-inquiry portion of the lab. We provide extra materials where possible, with the understanding that students may choose to pursue a variety of different directions when exploring further opportunities for inquiry.

This publication will provide you with a short description of each Advanced Inquiry Lab kit, how the Advanced Inquiry Lab correlates to the College Board Investigative Labs, and also a list of additional required lab equipment and supplies such as balances, spectrophotometers, and common laboratory glassware.
