7. $f(x) = |3x| + 2$; horizontal shrink by a factor of $\frac{1}{3}$
8. $f(x) = -2|x - 2| + 4$; vertical stretch by a factor of 2

In Exercises 9–10, describe the transformation from the graph of f to the graph of g .

9.

x	-1	1	3	5
$f(x)$	-2	-1	0	1

$f(x)$	9	5	1	-3
$g(x)$	14	10	6	2

In Exercises 11–12, describe the transformation of f represented by g . Then graph each function.

11. $f(x) = 2x - 5$; $g(x) = 2f(x + 3)$
12. $f(x) = 3|x| - 2$; $g(x) = -f(x - 6)$

In Exercises 13 and 14, write a function g whose graph represents the indicated transformations of the graph of f .

The Testing Charade Daniel Koretz,2017-08-31 For decades we've been studying experimenting with and wrangling

over different approaches to improving public education and there's still little consensus on what works and what to do. The one thing people seem to agree on however is that schools need to be held accountable; we need to know whether what they're doing is actually working. But what does that mean in practice? High stakes tests. Lots of them. And that has become a major problem. Daniel Koretz, one of the nation's foremost experts on educational testing, argues in *The Testing Charade* that the whole idea of test-based accountability has failed; it has increasingly become an end in itself, harming students and corrupting the very ideals of teaching. In this powerful polemic built on unimpeachable evidence and rooted in decades of experience with educational testing, Koretz calls out high stakes testing as a sham, a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement. Rather than setting up incentives to divert instructional time to pointless test prep, he argues, we need to measure what matters and measure it in multiple ways, not just via standardized tests. Right now we're lying to ourselves about whether our children are learning. And the longer we accept that lie, the more damage we do. It's time to end our blind reliance on high stakes tests. With *The Testing Charade*, Daniel Koretz insists that we face the facts and change course, and he gives us a blueprint for doing better.

Contemporary Pioneers in Teaching and Learning Volume 2 Héfer Bembenuatty, 2022-02-01. This volume traces the socialization process, professional development, career paths, and theory and research of contemporary pioneers in education and psychology. This volume contains interviews with leading scholars who are at the vanguard of teaching and learning. They shared how their childhood development influenced their theoretical paths and research endeavors and revealed their thoughts, beliefs, and experiences that made them who they are today. These scholars responded to questions pertaining to their childhood, initial interest in education and psychology, role models, research interests, and major findings, future directions of their research, educational implications derived from their research, and perception of their legacy. They are real people who have had experiences like anybody else, but found homes and teachers who supported them. While in college, they found educators who mentored them. Readers will find that this volume offers them an opportunity to learn the background of contemporary pioneers in education and psychology, provides valuable sources where they can learn about how major theories developed and where they are moving, and reveals the personal anecdotes that influenced the conceptualization of contemporary theories and research. Educators and students will find that this book provides hope and a rejuvenated enthusiasm about the status of education and psychology, and that they too can be leaders in their own ways.
