

# General Relativity (Einstein, 1915)

- Gravity is equivalent to Acceleration.
- Massive bodies or strong accelerations cause SpaceTime to curve significantly.
- A scientist cannot distinguish between being in a stationary box on Earth or in a spaceship, accelerating at  $9.8 \text{ m/s}^2$  ( $32.2 \text{ ft/s}^2$ ), in deep empty space.\*

Agent Relative Ethics Steven Jensen, 2023-07-07 Agent Relative Ethics asks what the world would look like if we adopted agent relativity wholeheartedly clinging to no shred of absolute morality Alastair MacIntyre's haunting image of a post apocalyptic world in which our knowledge of ethics has been fragmented poses a contrast between modern morality and ancient ethics The two stand divided along the fault line of the nature of the good Modern ethics has placed its stake in the absolute good while ancient ethics rests upon the foundation of the relative good Following the lead of Bernard Williams Agent Relative Ethics identifies alienation as a disturbing symptom of the present focus upon absolute goods It then completes the diagnosis of the malady afflicting modern moral theory by clarifying the difference between absolute and relative goods The remainder of the book explores how agent relativity can overcome the modern fragmentation of our ethical knowledge Not just any relative goods can rectify the modern disorder Only shared goods belonging to a union of individuals are sufficiently robust to overthrow the contemporary despotism of neutral goods These shared goods exhibit many parallels with common sense morality including partiality impartiality punishment and an antagonism toward harmfully using others together with a more lenient attitude toward foreseeing harm The final chapters probe the conditions often unpalatable to the modern mind by which ethics might be restored Agent Relative Ethics will be of interest to scholars and advanced students working in ethics and moral theory ancient ethics and the history of philosophy

**Ethics Across the Curriculum** Michael Boylan, James A. Donahue, 2003-01-01 Philosopher Michael Boylan and theologian James A Donahue provide a framework compatible with humanist and theist beliefs that will enable college and university professors to address a full range of ethical issues as they arise in classroom discussion both in the academic disciplines and in professional education

*Dialogue on Grief and Consolation* Terence O'Connell, 2009 Have you lost a loved one The loss can be inestimable the grief excruciating What helped you Did someone say something comforting Did someone offer a consolation which you resented Have you ever tried to comfort someone with a terminal illness or one who has lost a loved one Knowing how to help or what to say that is not trite insincere or superficial can be difficult The point of view of a grieving person is quite different from that of those who wish to offer comfort In a multicultural society such as ours anticipating the beliefs of the grieving person can be even more difficult This book explores the perspective of a grieving person It considers the merits and potential harm of alternative comfort strategies As a philosophical analysis of grief it emphasizes an understanding of the beliefs that underlie grief and the usefulness or dangers of emotions Because grief is so complex and sensitive a narrow approach runs the risk of alienating the grieving person The ideas in this book are expressed in a dialogue among three characters Their discussion is broad and fundamental Starting from the familiar consolation She is no longer suffering and the grieving person's resentment toward the expression the three friends articulate the value of life and the evils of death Their discussion enriches their understanding of grief Many consolations offered to mourners are poor

arguments Even the better ones do their work best in the context of a greater understanding of grief **Spinoza** Olli Koistinen, John Ivan Biro, 2002 The essays in this volume investigate several themes notably Spinoza's monism the nature of the individual the relation between mind and body and his place in 17th century philosophy **On the Ethical Philosophy of Edith Stein** William E. Tullius, 2024-09-03 Although she never penned a text dedicated exclusively to ethics Edith Stein's work encompasses an implicit but self consciously developed moral philosophy not yet sufficiently developed in the current English language literature However comparison of Stein's anthropological and metaphysical theories against the ethical philosophy of other early phenomenological thinkers such as Max Scheler and Edmund Husserl reveals lines of moral theory woven throughout her texts In *On the Ethical Philosophy of Edith Stein Outlines of Morality* William E Tullius endeavors to present a systematic account of Stein's moral thought as it takes shape in conversation with neo scholasticism and develops across her corpus in conversation with her philosophical anthropology axiological theory and metaphysics The ethics which emerge from these sources is oriented around the moral project of the development of personality through the unfolding of one's personal core and which entails a call to the development of an ethical community reflective of and oriented by its responsiveness to the highest values and to the communal destiny of all humanity in God **The German Historical School** Yuichi Shionoya, 2000-10-12 This book clarifies the approach of the German Historical School by the reconstruction of their achievements in terms of rational and historical context **Straight Goods in Philosophy** David Patterson Hatch, 1910 [Encyclopedia of Global Justice](#) Deen K. Chatterjee, 2012-01-23 This two volume *Encyclopedia of Global Justice* published by Springer along with Springer's book series *Studies in Global Justice* is a major publication venture toward a comprehensive coverage of this timely topic The *Encyclopedia* is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The *Encyclopedia* sets the tone and direction of this increasingly important area of scholarship for years to come The entries number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas **What Makes Time Special?** Craig Callender, 2017-06-30 As we navigate through life we instinctively model time as having a flowing present that divides a fixed past from open future This model develops in childhood and is deeply saturated within our language thought and behavior affecting our conceptions of the universe freedom and the self Yet as central as it is to our lives physics seems to have no room for this flowing present *What Makes Time Special* demonstrates this claim in detail and then turns to two novel positive tasks First by looking at the world sideways in the spatial directions it shows that physics is not spatializing time as is commonly alleged Even relativity theory makes significant distinctions between the spacelike and timelike directions often with surprising consequences Second if the flowing present is an illusion it is a deep one worthy of

explanation The author develops a picture whereby the temporal flow arises as an interaction effect between an observer and the physics of the world Using insights from philosophy cognitive science biology psychology and physics the theory claims that the flowing present model of time is the natural reaction to the perceptual and evolutionary challenges thrown at us Modeling time as flowing makes sense even if it misrepresents it **Distant Strangers** Judith Lichtenberg,2014

Lichtenberg argues for a practical and moral approach to reducing poverty exploring concepts such as altruism responding to criticisms of the effectiveness of aid and asking whether and how the world's richer populations should assist This book is for those interested in ethics political theory public policy and development studies *The Oxford Handbook of Value Theory* Iwao Hirose,Jonas Olson,2015-04-01 Value theory or axiology looks at what things are good or bad how good or bad they are and most fundamentally what it is for a thing to be good or bad Questions about value and about what is valuable are important to moral philosophers since most moral theories hold that we ought to promote the good even if this is not the only thing we ought to do This Handbook focuses on value theory as it pertains to ethics broadly construed and provides a comprehensive overview of contemporary debates pertaining not only to philosophy but also to other disciplines most notably political theory and economics The Handbook's twenty two newly commissioned chapters are divided into three parts Part I Foundations concerns fundamental and interrelated issues about the nature of value and distinctions between kinds of value Part II Structure concerns formal properties of value that bear on the possibilities of measuring and comparing value Part III Extensions finally considers specific topics ranging from health to freedom where questions of value figure prominently
