Globalized Finance and Varieties of Capitalism H. van Zon, 2016-05-01 Hans van Zon analyzes the financialization of developed capitalism and argues that the emergence of finance as a dominant force has contributed to the relative decline of the West. He demonstrates that the neo liberal model is inherently unstable and undermines capitalist economies which can only function if they are embedded in institutions that are non or even pre capitalist. He shows how a toxic combination of financialization, corporate globalization and a deregulated and parasitic financial industry have led to structural economic stagnation in both the USA and the greater part of the EU.

Credit Rating Governance Ahmed Naciri, 2015-01-30 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies as expressed by their ability to fairly, ethically and consistently assign higher rates to issuers having lesser default risks. However, factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, financial economics, risk management, investment management and banking.

Ireland International Monetary Fund, 2011-05-20 Ireland has made progress in overcoming the economic crisis. The new coalition government's strategy for restoring sustained growth, sound public finances and job creation has been put forward in the context of the European Union IMF supported program. On this basis, the government adopted a comprehensive strategy to reorganize and deleverage domestic banks and to strengthen their capital base. Steadfast implementation of policies coupled with support from a comprehensive European plan will foster Ireland's economy.
