Bibliography of the Zulu Language to the Year 1998 Nelly Mokhonoana, 1999

Handbook of Literacy in Diglossia and in Dialectal Contexts Elinor Saiegh-Haddad, Lior Laks, Catherine McBride, 2022-03-14 This volume is the first published collection of papers on the impact of diglossia and dialectal variations on language and literacy acquisition impairment and education. The authors are pioneering in this field and are leading researchers with substantial experience in conducting research in this area. A wide range of areas and languages are covered including the US, South Africa, Israel and various European countries. The chapters present novel data and insights regarding the role of dialectal variations on language and literacy from a wide range of countries and perspectives. These insights have significant theoretical and practical implications. A majority of literacy learners worldwide are taught to read and write in a language variety or a dialect that is not the same as their spoken language. Not only is this the global norm but it is probably also the greatest obstacle to literacy learning. This volume is the first published collection of papers on the role of dialect in language and literacy acquisition impairment and education in a variety of languages and situations across Europe, the Middle East, North America, Africa and Asia. The authors are pioneers in this field.

A Vision for Science Education Roger Cross, 2004-08-02 One of the most important and consistent voices in the reform of science education over the last thirty years has been that of Peter Fensham. His vision of a democratic and socially responsible science education for all has inspired change in schools and colleges throughout the world. Often moving against the tide, Fensham travelled the world to promote his radical ideology. He was appointed Australia's first Professor of Science Education and was later made a Member of the Order of Australia in recognition of his work in this new and emerging field of study. In this unique book, leading science educators from around the world examine and discuss Fensham's key ideas. Each describes how his arguments, proposals and recommendations have affected their own practice and extend and modify his message in light of current issues and trends in science education. The result is a vision for the future of science teaching internationally. Academics, researchers and practitioners in science education around the world will find this book a fascinating insight into the life and work of one of the foremost pioneers in science education. The book will also make inspiring reading for postgraduate students of science education.

Safe Spaces Cornelia Roux, 2012-10-26 This book examines the crucial issues affecting Human Rights Education in contexts of culture, religion and societal diversity. It exhibits an impressive scholarly achievement, capturing and combining the insights of both established academics and emerging researchers. Each author succeeds in distilling the knowledge of their particular fields of interest as well as conveying the essence of their intuitive understanding and the richness of the context. This book considers a variety of connected content and methodological issues in three major sections: Philosophical and policy perspectives, Gender discourses, diverse perspectives and Discourses on narratives as safe spaces. The Edition is further strengthened by allowing international reviewers the opportunity of engaging with the contributors in the Introduction and Conclusion, an innovative

departure from conventional formats and which will provide a global perspective to the readers The focus of the various chapters succeeds in establishing both a foundation and platform for dialogue surrounding human rights and human rights education in modern policy and governance Aptly named *Safe Spaces* the Edition offers in depth and credible safe nuances spaces in terms of the somewhat reified concept of human rights at a time when human rights remains a highly topical and contested international issue As such the book imparts an immense scope of theoretical and empirical perspectives reflected by the distinguished intellectuals who navigate the terrain of their respective disciplines with profound erudition This book represents a collaborative effort of immeasurable value This exemplary edition is both timeous and will prove timeless

Drawing for Science Education Phyllis Katz, 2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development in science teaching and learning
