LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

My criteria were: color, size, and shape.

Did your lizards grow similar? How? Why?

Yes, they all grew to the same size. I thought about how they all had the same shape and color, but I didn't know how to explain it. I thought about the lizards.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the lizard lab.

The lizards in the lab were all green. This was because they were all green. This was because they were all green. This was because they were all green.

Provide one evolutionary explanation for why lizards that are green are better at hiding than lizards that are brown. What is the selective pressure?

The lizards that are green are better at hiding than lizards that are brown. This is because they are green. This is because they are green. This is because they are green.
