International Adoption in North American Literature and Culture Mark Shackleton, 2017-09-06. This book is about transnational and transracial adoption in North American culture. It asks to what extent does the process of international adoption reflect imperious inequalities around the world or can international adoption and the personal experiences of international adoptees today be seen more positively as what has been called the richness of adoptive being. The areas covered include Native North American adoption policies and the responses of Native North American writers themselves to these policies of assimilation. This might be termed adoption from within. Adoption from without, transnational adoption, is primarily dealt with in articles discussing Chinese and Korean adoptions in the US. The third section concerns such issues as the multiple forms that adoption can take, notions of adoption and identity, adoption and the family, and the problems of adoption.

Routledge Handbook of Naval Strategy and Security Joachim Krause, Sebastian Bruns, 2016-03-17. This new handbook provides a comprehensive overview of the issues facing naval strategy and security in the twenty-first century. Featuring contributions from some of the world's premier researchers and practitioners in the field of naval strategy and security, this handbook covers naval security issues in diverse regions of the world, from the Indian Ocean and the Mediterranean to the Arctic and the piracy-prone waters off East Africa's coast. It outlines major policy challenges arising from competing claims, transnational organized crime, and maritime terrorism, and details national and alliance reactions to these problems. While this volume provides detailed analyses on operational, judicial, and legislative consequences that contemporary maritime security threats pose, it also places a specific emphasis on naval strategy. With a public very much focused on the softer constabulary roles naval forces play, such as humanitarian assistance, disaster relief, naval diplomacy, maintenance of good order at sea, the overarching hard power role of navies has been pushed into the background. In fact, navies and seapower have been notably absent from many recent academic discussions and deliberations of maritime security. This handbook provides a much desired addition to the literature for researchers and analysts in the social sciences on the relationship between security policy and military means on land and from the sea. It comprehensively explains the state of naval security in this maritime century and the role of naval forces in it. This book will be of much interest to students of naval security and naval strategy, security studies, and IR, as well as practitioners in the field.

Multilateral Asian Security Architecture See Seng Tan, 2015-07-16. This book provides a comparative assessment of the material and ideational contributions of five countries to the regional architecture of post-Cold War Asia. In contrast to the usual emphasis placed on the role and centrality of the Association of Southeast Asian Nations (ASEAN) in Asia's multilateral architecture and its component institutions, this book argues that the four non-ASEAN countries of interest here—Australia, Japan, China, and the United States—have played and continue to play an influential part in determining the shape and substance

of Asian multilateralism from its pre inception to the present The work does not contend that existing scholarship overstates ASEAN s significance to the successes and failures of Asia s multilateral enterprise Rather it claims that the impact of non ASEAN stakeholders in innovating multilateral architecture in Asia has been understated Whether ASEAN has fared well or poorly as a custodian of Asia s regional architecture the fact remains that the countries considered here notwithstanding their present discontent over the state of that architecture are key to understanding the evolution of Asian multilateralism This book will be of much interest to students of Asian politics international organisations security studies and IR more generally
