Libraries Christopher DeCristofaro, James Hutter, Nick Tanzi, 2020-01-08 Emerging technologies can intimidate with their cost and uncertainty; this book provides flexible options for adopting the most popular ones. Introducing new technologies to your library can be a daunting process; they can be costly, they may be unfamiliar to many staff members, and their success is far from assured. To address these concerns, *Best Technologies for Public Libraries* accommodates budgets large and small, providing options for both the ambitious and the cost-conscious. Authors Christopher DeCristofaro, James Hutter, and Nick Tanzi provide a resource for staff looking to incorporate a number of emerging technologies into their library and makerspaces. Each chapter explores a new technology, including 3D printing, drones, augmented reality, and virtual reality, covering how the technologies work, the selection process, training, sample programming, best practices, and relevant policy. By describing a variety of program and service ideas across age groups, the book gives readers the ability to first evaluate them.
