Technology and Culture from the Renaissance to the Present

Third Edition

Leonardo To The Internet

Lynn Van Gorp

Leonardo To The Internet:

Leonardo to the Internet Thomas J. Misa, 2004 Beginning his narrative at the dawn of the modern era he surveys the intersections of technology politics and culture in the Renaissance court system of Western Europe the role of technology in Holland's commercial expansion the diverse paths to and through Britain's industrial revolution the links among technology imperialism and trade in the nineteenth century and the application of scientific discoveries in chemistry and physics to industry in Germany and the United States at the turn of the twentieth century He then examines the introduction of mass produced consumer goods and their impact on daily life and modernist sensibilities the rise of the military industrial complex during World War II and the technological innovations generated by the command and control economies of the Cold War and the emergence of a technology oriented global culture since the 1970s

Leonardo to the Internet Thomas J. Misa, 2022-02-22 Now updated A comprehensive 500 year history of technology in society Historian Thomas J Misa's sweeping history of the relationship between technology and society over the past 500 years reveals how technological innovations have shaped and have been shaped by the cultures in which they arose Spanning the preindustrial past the age of scientific political and industrial revolutions as well as the more recent eras of imperialism modernism and global security this compelling work evaluates what Misa calls the question of technology In this edition Misa brings his acclaimed text up to date by drawing on current scholarship while retaining sharply drawn portraits of individual people artifacts and systems Each chapter has been honed to relate to contemporary concerns Globalization Misa argues looks differently considering today's virulent nationalism cultural chauvinism and trade wars A new chapter focuses on the digital age from 1990 to 2016 The book also examines how today's unsustainable energy systems insecure information networks and vulnerable global shipping have helped foster geopolitical risks and instability and takes a look at the coronavirus pandemic from the perspective of Wuhan China's high tech district A masterful analysis of how technology and culture have influenced each other over five centuries Leonardo to the Internet frames a history that illuminates modern day problems and prospects faced by our technology dependent world

Unmanned Aerial Vehicles for Internet of Things (IoT) Vandana Mohindru, Yashwant Singh, Ravindara Bhatt, Anuj Kumar Gupta, 2021-08-03 UNMANNED AERIAL VEHICLES FOR INTERNET OF THINGS This comprehensive book deeply discusses the theoretical and technical issues of unmanned aerial vehicles for deployment by industries and civil authorities in Internet of Things IoT systems Unmanned aerial vehicles UAVs has become one of the rapidly growing areas of technology with widespread applications covering various domains UAVs play a very important role in delivering Internet of Things IoT services in small and low power devices such as sensors cameras GPS receivers etc These devices are energy constrained and are unable to communicate over long distances The UAVs work dynamically for IoT applications in which they collect data and transmit it to other devices that are out of communication range Furthermore the benefits of the UAV include deployment at remote locations the ability to carry flexible payloads

reprogrammability during tasks and the ability to sense for anything from anywhere Using IoT technologies a UAV may be observed as a terminal device connected with the ubiquitous network where many other UAVs are communicating navigating controlling and surveilling in real time and beyond line of sight The aim of the 15 chapters in this book help to realize the full potential of UAVs for the IoT by addressing its numerous concepts issues and challenges and develops conceptual and technological solutions for handling them Applications include such fields as disaster management structural inspection goods delivery transportation localization mapping pollution and radiation monitoring search and rescue farming etc In addition the book covers Efficient energy management systems in UAV based IoT networks IoE enabled UAVs Mind controlled UAV using Brain Computer Interface BCI The importance of AI in realizing autonomous and intelligent flying IoT Blockchain based solutions for various security issues in UAV enabled IoT The challenges and threats of UAVs such as hijacking privacy cyber security and physical safety Audience Researchers in computer science Internet of Things IoT electronics engineering as well as industries that use and deploy drones and other unmanned aerial vehicles
