**Thinking and Acting Systemically** Alan Daly, Kara Finnigan, 2016-05-19 This volume argues that districts are important as a lever for change given the limited success of school by school efforts Policies that focus on skill development recognize and support performance create opportunities for collaboration build leader capacity and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it away from blame and toward complex systems change Mathematical Competencies in the Digital Era Uffe Thomas Jankvist, Eirini Geraniou, 2023-02-20 This book focuses on the potential interplay between two distinct yet related paradigm shifts in mathematics education drawing on the notion of networking of theories through illustrative case studies from the Danish educational system and beyond The first paradigm shift is the massive introduction of digital technology in the teaching and learning of the subject the second is a shift from the traditional focusing on mastering of skills and knowledge to being concerned with the possession and development of mathematical competencies This book builds on the Danish KOM Competencies and the Learning of Mathematics project which sources its description of mathematical mastery primarily on the notion of a mathematical competency rather than on lists of topics concepts and results This allows for an overarching framework which captures the perspectives of mathematics teaching and learning at whichever educational level While the KOM framework does not in detail address the role of digital technologies in relation to its description of different types of mathematical competencies etc the chapters of this book set out to do exactly this while in the process also drawing on a selection of other theoretical constructs and frameworks from mathematics education research Starting with introductory chapters by key researchers in the area the book brings forth chapters for each of the KOM framework's eight mathematical competencies authored by Nordic researchers in combination with international scholars The KOM framework also operates with three types of overview and judgement which are specifically addressed in relation to the role of digital technologies in the third part of the book The fourth and final part of the book broadens the scene and provides chapters of a more perspective nature in relation to mathematical competencies in the digital era The book's preface is by Susanne Prediger *Disciplinary and Content Literacy for Today's Adolescents, Sixth Edition* William G. Brozo, 2017-04-24 Well established as a clear comprehensive course text in five prior editions this book has now been

extensively revised with a focus on disciplinary literacy It offers a research based framework for helping students in grades 6 12 learn to read write and communicate academic content and to develop the unique literacy language and problem solving skills required by the different disciplines In an engaging conversational style William G Brozo presents effective instruction and assessment practices illustrated with extended case studies and sample forms Special attention is given to adaptations to support diverse populations including English language learners Prior edition title Content Literacy for Today s Adolescents Fifth Edition New to This Edition Shift in focus to disciplinary literacy as well as general content area learning Chapter on culturally and linguistically diverse learners Incorporates a decade of research and the goals of the Common Core State Standards Increased attention to academic vocabulary English language learners the use of technology and multiple text sources such as graphic novels and digital texts Pedagogical features chapter opening questions plus new case studies classroom dialogues practical examples sample forms and more International Practices to Promote Budget Literacy

Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government s fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives

**International Perspectives on Teaching and Learning for Mathematical Literacy**, 2024-10-02 Mathematics plays an important role in today s world and is used in daily life more than is often appreciated Mathematical literacy denotes the competence to deal with the mathematical issues of life in modern society The underlying purpose of this book is to support the development of rich understandings and practices of how an education for mathematical literacy can be realised The

*Hollowed Out* David Madland, 2015-06-24 For the past several decades politicians and economists have thought that high levels of inequality were good for the economy But an economy that works only for the rich simply doesn't work Because the middle class is so weak America's economy now suffers from the kinds of problems that plague less developed countries Privileged elites more frequently secure special treatment from a government that wastes money and stifles competition Children's opportunities are excessively determined by the wealth of their parents Societal distrust has increased making business transactions needlessly difficult Consumer demand has weakened and become unstable which has helped fuel the Great Recession and has made the recovery painfully slow As *Hollowed Out* explains to have strong and sustainable growth the economy needs to work for everyone and grow from the middle out This new middle out theory aims to supplant trickle down economics the theory that was so wrong about inequality and our economy and did so much damage to our nation This new thinking has the potential to shape economic policymaking for generations Provided by publisher

**Critical Forensic Studies** Roberta Julian, Loene Howes, Rob White, 2021-12-20 This book provides a comprehensive overview of the emerging interdisciplinary field of critical forensic studies It reviews existing research and scholarship on forensic science from a critical social science perspective while forging a blueprint for further work in this area Forensic science has long captured the public imagination as evidenced by the popularity of many novels television programmes and true crime podcasts At the same time its role in the criminal justice system has been the subject of critique from scholars and practitioners in diverse fields In response the international forensic science community has become more involved in the scrutiny of its own knowledge and practices in relation to criminal justice objectives Moving beyond a discussion of forensic science as a suite of specialised scientific disciplines that aim to provide evidence to the courts *Critical Forensic Studies* offers critical insights relevant to a wide range of social actors in the criminal justice system Core content includes the history and public understandings of forensic science the professionalisation of forensic science forensic science as a social process crime scene examination and forensic intelligence experts and evidence in court technological advances and human rights interdisciplinary knowledge practice and research This book is essential reading for forensic and criminal justice practitioners and students across criminology sociology forensic science law and psychology

**Creating Curricula: Aims, Knowledge and Control** Dominic Wyse, 2018-03-08 Knowledge has been a defining focus for the curriculum studies field In the early part of the 21st century convincing arguments were mounted that knowledge needed to be brought back in both to the curriculum of schools and to the attention of curriculum researchers This book is a result of these arguments and what some regarded as a crisis in curriculum study related to the growing emphasis on international comparisons between education systems The book's most important contribution is to build on seminal work in the sociology and philosophy of

education in order to develop new foundations for curriculum study using the importance of transactions as the context for understanding knowledge in the curriculum The contributors build on this importance to suggest a rapprochement in the field around the idea of curriculum knowledge as both constructed and real This book was originally published as a special issue of The Curriculum Journal      **Engaging Families as Children's First Mathematics Educators** Sivan

Phillipson, Ann Gervasoni, Peter Sullivan, 2016-11-21 This book explores how professionals can engage and inspire parents to support their young children's mathematics learning Bringing together international experts researchers and scholars it proposes a framework for engaging with and supporting parents including those who are less aware of the crucial development of children's mathematical skills in the early years Focusing on mathematics learning from birth to 5 years the book's underlying assumption is that it is possible to offer guidance to professionals working with families with young children concerning how to engage and support families in the area of mathematics learning including those families who seem alienated from education services Specifically the respective chapters present a framework for understanding children's early mathematical development and the important role of families in this regard They describe effective strategies for engaging families in their children's mathematics learning including those who are marginalised and experience multiple disadvantages so that all families can best support their children's mathematical learning and their development of positive attitudes towards learning In closing hurdles and opportunities within the systems surrounding family engagement are addressed
