Memorandum Feb March 2015 Mathematics

Lyndon H. LaRouche, Jr.

Memorandum Feb March 2015 Mathematics:

Reading Mathematics in Early Modern Europe Philip Beeley, Yelda Nasifoglu, Benjamin Wardhaugh, 2020-10-20 Libraries and archives contain many thousands of early modern mathematical books of which almost equally many bear readers marks ranging from deliberate annotations and accidental blots to corrections and underlinings. Such evidence provides us with the material and intellectual tools for exploring the nature of mathematical reading and the ways in which mathematics was disseminated and assimilated across different social milieus in the early centuries of print culture. Other evidence is important too as the case studies collected in the volume document scholarly correspondence can help us understand the motives and difficulties in producing new printed texts; library catalogues can illuminate collection practices while manuscripts can teach us more about textual traditions. By defining and illuminating the distinctive world of early modern mathematical reading, the volume seeks to close the gap between the history of mathematics as a history of texts and history of mathematics as part of the broader history of human culture. **CDS 12 Years Topic-wise Solved Papers**

Mathematics, English & General Knowledge (2007-2018) - 3rd Edition Disha Experts, 2018-06-01 The thoroughly revised updated 3rd edition of CDS 12 Years Mathematics English General Knowledge Topic wise Solved Papers 2007 Feb 2018 Feb consists of last 12 years both Feb and November papers from 2007 Paper 1 2018 Paper 1 solved papers of Elementary Mathematics English and General Knowledge distributed into 42 topics. In all there are 23 Question papers from 2007 to 2018 I which have been divided into the above discussed 42 topics. Practicing these questions aspirants will come to know about the pattern and toughness of the questions asked in the examination. All the papers are divided into following sections: Section I Mathematics which is distributed into 25 topics; Section II English is divided into 8 topics; Section III General Knowledge is divided into 9 topics. The book contains 6460 MILESTONE MCQs from the above 23 Question papers. The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail step by step so as to provide 100% concept clarity to the students. Finance, Economics, and Mathematics Oldrich A. Vasicek, 2015-11-24 The compiled works of the man behind the evolution of quantitative finance. Finance, Economics and Mathematics is the complete Vasicek reference work including published and unpublished work and interviews with the man himself. The name Oldrich A. Vasicek is synonymous with cutting edge research in the finance fields and this book comes straight from the source to bring you the undiluted mother lode of quant wisdom from one of the founders of the field. From his early work in yield curve dynamics to the mean reverting short rate model to his thoughts on derivatives pricing to his work on credit risk to his most recent research on the economics of interest rates, this book represents the life's work of an industry leader. Going beyond the papers you'll also find the more personal side: inspirational as Vasicek talks about the academics and professionals who made lasting impressions and collaborated, debated and ultimately helped spawn some of his greatest thinking. his groundbreaking research in quantitative finance You've followed his work for years this book puts it all in a single volume to give you the definitive reference you'll turn to again and again Explore Vasicek's insights on topics he helped create Discover his research and ideas that have gone unpublished until now Understand yield curves and the Vasicek model from the source himself Gain a reference collection of some of the most influential work in quantitative finance Vasicek's research is the foundation of one of the most important innovations in finance Quants around the world have been influenced by his ideas and his status as thought leader is cemented in the annals of finance history Finance Economics and Mathematics is the definitive Vasicek reference every finance professional needs

Discrimination based on Colour, Ethnic Origin, Language, Religion and Belief in Turkey's Education System Nurcan Kaya, 2015-10-27 The Turkish government is urged to make a fundamental shift in its approach to education by Minority Rights Group International MRG in a new report A long standing focus on state building has been supplemented by increasing emphasis on religious teaching Both feature strongly in the education system in Turkey making schools a focus of discrimination The report Discrimination based on Colour Ethnic Origin Language Religion and Belief in Turkey's Education System reveals evidence of discrimination of minority groups and suggests comprehensive reforms to effectively ensure equality The national education system which for decades aimed to create young Turkish nationalists has in recent years become a vehicle for raising young religious Turkish nationalists says Nurcan Kaya Turkey Coordinator of Minority Rights Group International Religious education is compulsory from grade four in primary schools While some information on world religions has been introduced the emphasis remains on teaching Sunni Muslim religious practices Children of Jewish and Christian families may apply to opt out but the process can be cumbersome and in many schools alternatives are not provided for them Non Muslim students who have opted out can still find themselves having to remain in the religious instruction class or alternatively having to wander in the school corridor making them vulnerable to taunts from pupils and even teachers The opt out possibility is still not available to children of other minorities Another issue is mother tongue education In 2012 a new elective on the living languages and dialects in Turkey was introduced but due to various limitations minorities remain marginalised others in the education system Subsequent to the 2012 reform the report monitors discrimination in the formal education system in the period of the academic year of 2014-2015 The findings are based on the field work of the Monitoring Discrimination in Education Network an alliance of 16 organizations working in Turkey The report compiles numerous cases of discrimination based on language religion ethnicity skin colour and the level of income In order to bring about a fundamental solution to these problems in the education system the government must prioritise developing an approach that sees all groups as equal and that responds to demands for rights based on such an understanding of equality says Kaya The report highlights that Turkey has no anti discrimination law or an equality commission to which victims of discrimination can apply The existing legislation contains no effective and accessible means of judicial remedies or compensation Therefore many discriminatory practices are not reported to school

administrations The entire education system is based on Turkishness Non Turkish groups are either not referred to or referred in a negative way says Kaya Education system has played a significant role in deepening conflict in society The positive representation of other groups in the education system would contribute to social peace and harmony In order to resolve the many problems in the education system that the current approach causes the overall aim of government education policy should be cleared of ideological references and the protection of children s best interests and the right to education in line with international standards should be considered its fundamental goal says the report

The World the Game Theorists Made Paul Erickson,2015-11-04 In recent decades game theory the mathematics of rational decision making by interacting individuals has assumed a central place in our understanding of capitalist markets the evolution of social behavior in animals and even the ethics of altruism and fairness in human beings With game theory s ubiquity however has come a great deal of misunderstanding Critics of the contemporary social sciences view it as part of an unwelcome trend toward the marginalization of historicist and interpretive styles of inquiry and many accuse its proponents of presenting a thin and empirically dubious view of human choice The World the Game Theorists Made seeks to explain the ascendancy of game theory focusing on the poorly understood period between the publication of John von Neumann and Oscar Morgenstern s seminal Theory of Games and Economic Behavior in 1944 and the theory s revival in economics in the 1980s Drawing on a diverse collection of institutional archives personal correspondence and papers and interviews Paul Erickson shows how game theory offered social scientists biologists military strategists and others a common flexible language that could facilitate wide ranging thought and debate on some of the most critical issues of the day

Multiphase Particulate Systems in Turbulent Flows Wioletta Podgórska,2019-09-17 Multiphase Particulate Systems in Turbulent Flows Fluid Liquid and Solid Liquid Liquid Dispersions provides methods necessary to analyze complex particulate systems and related phenomena including physical chemical and mathematical description of fundamental processes influencing crystal size and shape suspension rheology interfacial area of drops and bubbles in extractors and bubble columns Examples of mathematical model formulation for different processes taking place in such systems is shown Discussing connections between turbulent mixing mechanisms and precipitation it discusses influence of fine scale structure of turbulence including its intermittent character on breakage of drops bubbles cells plant cell aggregates An important aspect of the mathematical modeling presented in the book is multi fractal taking into account the influence of internal intermittency on different phenomena Key Features Provides detailed descriptions of dispersion processes in turbulent flow interactions between dispersed entities and continuous phase in a single volume Includes simulation models and validation experiments for liquid liquid gas liquid and solid liquid liquid dispersions in turbulent flows Helps reader learn formulation of mathematical models of breakage or aggregation processes using multifractal theory Explains how to solve different forms of population balance equations Presents a combination of theoretical and engineering approaches to particulate systems along with discussion of related diversity with exercises and case studies

Pareto-Nash-Stackelberg Game and Control Theory Valeriu Ungureanu,2018-03-09 This book presents a comprehensive new multi objective and integrative view on traditional game and control theories Consisting of 15 chapters it is divided into three parts covering noncooperative games mixtures of simultaneous and sequential multi objective games and multi agent control of Pareto Nash Stackelberg type games respectively Can multicriteria optimization game theory and optimal control be integrated into a unique theory Are there mathematical models and solution concepts that could constitute the basis of a new paradigm Is there a common approach and method to solve emerging problems The book addresses these and other related questions and problems to create the foundation for the Pareto Nash Stackelberg Game and Control Theory It considers a series of simultaneous Nash and sequential Stackelberg games single criterion and multicriteria Pareto games combining Nash and Stackelberg game concepts and Pareto optimization as well as a range of notions related to system control In addition it considers the problems of finding and representing the entire set of solutions Intended for researches professors specialists and students in the areas of game theory operational research applied mathematics economics computer science and engineering it also serves as a textbook for various courses in these fields

Using Neurophysiological Signals that Reflect Cognitive or Affective State Anne-Marie Brouwer,Thorsten O. Zander,Jan B. F. van Erp,2015-07-27 What can we learn from spontaneously occurring

brain and other physiological signals about an individual's cognitive and affective state and how can we make use of this information. One line of research that is actively involved with this question is Passive Brain Computer Interfaces (BCI). To date, most BCIs are aimed at assisting patients for whom brain signals could form an alternative output channel as opposed to more common human output channels like speech and moving the hands. However, brain signals possibly in combination with other physiological signals also form an output channel above and beyond the more usual ones; they can potentially provide continuous online information about an individual's cognitive and affective state without the need of conscious or effortful communication. The provided information could be used in a number of ways. Examples include monitoring cognitive workload through EEG and skin conductance for adaptive automation or using ERPs in response to errors to correct for a behavioral response. While Passive BCIs make use of online neurophysiological responses and close the interaction cycle between a user and a computer system, neurophysiological responses can also be used in an offline fashion. Examples of this include detecting amygdala responses for neuromarketing and measuring EEG and pupil dilation as indicators of mental effort for optimizing information systems. The described field of applied neurophysiology can strongly benefit from high quality scientific studies that control for confounding factors and use proper comparison conditions. Another area of relevance is ethics ranging from dubious product claims, acceptance of the technology by the general public, privacy of users to possible effects that these kinds of applications may have on society as a whole. In this Research Topic, we aimed to publish studies of the highest scientific quality that are directed towards applications that utilize spontaneously effortlessly generated neurophysiological signals, brain and/or other physiological signals reflecting cognitive or affective state. We especially welcomed studies that describe specific real world applications demonstrating a significant benefit compared to standard applications. We also invited original new kinds of proposed applications in this area as well as comprehensive review articles that point out what is and what is not possible according to scientific standards in this field. Finally, we welcomed manuscripts on the ethical issues that are involved. Connected to the Research Topic was a workshop held on June 6 during the Fifth International Brain Computer Interface Meeting, June 3-7, 2013, Asilomar, California, that brought together a diverse group of people who were working in this field. We discussed the state of the art and formulated major challenges as reflected in the first paper of the Research Topic.

Mathematics in the Real World Christine Zuchora-Walske, 2015-12-15. Take a look into the fascinating world of mathematics: why it is an intriguing STEM career and the amazing work scientists in this field have accomplished throughout the years.

Between Worlds Linda Chisholm, 2017-11-30. How the story of how missionary schools adopted the Bantu education reforms gives insight into the ongoing legacy of the apartheid in the South African educational system. The transition from apartheid to the post-apartheid era has highlighted questions about the past and the persistence of its influence in present day South Africa. This is particularly so in education where the past continues to play a decisive role in relation to inequality. Between Worlds: German Missionaries and the Transition from Mission to Bantu.

Education in South Africa scrutinises the experience of a hitherto unexplored German mission society probing the complexities and paradoxes of social change in education It raises challenging questions about the nature of mission education legacies Linda Chisholm shows that the transition from mission to Bantu Education was far from seamless Instead past and present interpenetrated one another with resistance and compliance cohabiting in a complex new social order At the same time as missionaries complied with the new Bantu Education dictates they sought to secure a role for themselves in the face of demands of local communities for secular state controlled education When the latter was implemented in a perverted form from the mid 1950s one of its tools was textbooks in local languages developed by mission societies as part of a transnational project with African participation Introduced under the guise of expunging European control Bantu Education merely served to reinforce such control The response of local communities was an attempt to domesticate and master the foreign body of the mission so as to create access to a larger world This book focuses on the ensuing struggle fought on many fronts including medium of instruction and textbook content with concomitant sub texts relating to gender roles and sexuality South Africa s educational history is to this day informed by networks of people and ideas crossing geographic and racial boundaries The colonial legacy has inevitably involved cultural mixing and hybridisation with paradoxically parallel pleas for purity Chisholm explores how these ideas found expression in colliding and coalescing worlds one African the other European caught between mission and apartheid education

Crypto Wars Craig Jarvis, 2020-12-30 The crypto wars have raged for half a century In the 1970s digital privacy activists prophesied the emergence of an Orwellian State made possible by computer mediated mass surveillance The antidote digital encryption The U S government warned encryption would not only prevent surveillance of law abiding citizens but of criminals terrorists and foreign spies ushering in a rival dystopian future Both parties fought to defend the citizenry from what they believed the most perilous threats The government tried to control encryption to preserve its surveillance capabilities privacy activists armed citizens with cryptographic tools and challenged encryption regulations in the courts No clear victor has emerged from the crypto wars Governments have failed to forge a framework to govern the at times conflicting civil liberties of privacy and security in the digital age an age when such liberties have an outsized influence on the citizen State power balance Solving this problem is more urgent than ever Digital privacy will be one of the most important factors in how we architect twenty first century societies its management is paramount to our stewardship of democracy for future generations We must elevate the quality of debate on cryptography on how we govern security and privacy in our technology infused world Failure to end the crypto wars will result in societies sleepwalking into a future where the citizen State power balance is determined by a twentieth century status quo unfit for this century endangering both our privacy and security This book provides a history of the crypto wars with the hope its chronicling sets a foundation for peace

Immeasurable Weather Sara J. Grossman, 2023-06-30 In Immeasurable Weather Sara J Grossman explores how environmental data collection has been central to the larger project of settler colonialism in

the United States She draws on an extensive archive of historical and meteorological data spanning two centuries to show how American scientific institutions used information about the weather to establish and reinforce the foundations of a white patriarchal settler society Grossman outlines the relationship between climate data and state power in key moments in the history of American weather science from the nineteenth century public data gathering practices of settler farmers and teachers and the automation of weather data during the Dust Bowl to the role of meteorological satellites in data science s integration into the militarized state Throughout Grossman shows that weather science reproduced the natural world as something to be measured owned and exploited This data gathering she contends gave coherence to a national weather project and to a notion of the nation itself demonstrating that weather science s impact cannot be reduced to a set of quantifiable phenomena

The Power of Reason 1988 Lyndon H. LaRouche, Jr., 2015-09-02 From the Author s Foreword 1987 During the course of the past nearly twenty years I have become perhaps the most controversial among the influential international figures of this decade Unlike all of the other leading candidates for the U S presidency since 1945 I am an influential original thinker This is not to suggest that such prospective candidates as Vice President George Bush and Senator Robert Dole are lacking in intelligence or executive abilities For the past forty years the successful candidates for the presidency have been persons who in the customary manner of speaking advanced their political career up to that point by doing the right thing at the right time saying and doing nothing which will make enemies among important factions of the establishment Bush and Dole for example have adapted to those rules for success under ordinary conditions However this is a crisis in such crises what is customarily successful becomes a failure Our nation has once again entered into a time when only the unusual succeeds and the usual fails We have entered into a period of crisis in which only original thinkers are qualified to lead On paper our nation is a constitutional democratic republic In reality it has not been such a republic for approximately one hundred years certainly not since the sweeping changes in our form of government introduced during the presidency of Theodore Roosevelt Most of the time the policies of government the selection of most leading candidates for federal office and the majority of popular opinion have been regulated by behind the scenes committees representing what is called the establishment Under this arrangement candidates for leading office present themselves like job applicants for corporate executive appointments to this establishment The establishment either gives such candidates permission to campaign or not at this time If given such permission the candidate so authorized seeks backing for his or her election by the establishment by proving to the establishment that he or she can sell the policy which the establishment has decided to push at that time I began to understand this in 1947 I wished General Dwight Eisenhower to campaign for the 1948 Democratic nomination The general replied to me stating agreement with my policy arguments in support of his candidacy but informing me his candidacy was not appropriate at that time There is no doubt that Eisenhower could have won the 1948 nomination and election by a landslide had the establishment permitted him to campaign

Access to Scientific Research David J.

Brown,2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future

Kalman Filtering Mohinder S. Grewal,Angus P. Andrews,2015-02-02 The definitive textbook and professional reference on Kalman Filtering fully updated revised and expanded This book contains the latest developments in the implementation and application of Kalman filtering Authors Grewal and Andrews draw upon their decades of experience to offer an in depth examination of the subtleties common pitfalls and limitations of estimation theory as it applies to real world situations They present many illustrative examples including adaptations for nonlinear filtering global navigation satellite systems the error modeling of gyros and accelerometers inertial navigation systems and freeway traffic control Kalman Filtering Theory and Practice Using MATLAB Fourth Edition is an ideal textbook in advanced undergraduate and beginning graduate courses in stochastic processes and Kalman filtering It is also appropriate for self instruction or review by practicing engineers and scientists who want to learn more about this important topic
