Quiver Grassmannians of Extended Dynkin Type D Part I: Schubert Systems and Decompositions into Affine Spaces Oliver Lorscheid,Thorsten Weist,2019-12-02 Let Q be a quiver of extended Dynkin type D n In this first of two papers the authors show that the quiver Grassmannian Gre M has a decomposition into affine spaces for every dimension vector e and every indecomposable representation M of defect 1 and defect 0 with the exception of the non Schurian representations in homogeneous tubes The authors characterize the affine spaces in terms of the combinatorics of a fixed coefficient quiver for M The method of proof is to exhibit explicit equations for the Schubert cells of Gre M and to solve this system of equations successively in linear terms This leads to an intricate combinatorial problem for whose solution the authors develop the theory of Schubert systems In Part 2 of this pair of papers they extend the result of this paper to all indecomposable representations M of Q and determine explicit formulae for the F polynomial of M *Formality of the Little N-disks Operad* Pascal Lambrechts, Ismar Volić,2014-06-05 The little disks operad along with its variants is an important tool in homotopy theory It is defined in terms of configurations of disjoint dimensional disks inside the standard unit disk in and it was initially conceived for detecting and understanding fold loop spaces Its many uses now stretch across a variety of disciplines including topology algebra and mathematical physics In this paper the authors develop the details of Kontsevich s proof of the formality of little disks operad over the field of real numbers More precisely one can consider the singular chains on as well as the singular homology of These two objects are operads in the category of chain complexes The formality then states that there is a zig zag of quasi isomorphisms connecting these two operads The formality also in some sense holds in the category of commutative differential graded algebras The authors additionally prove a relative version of the formality for the inclusion of the little disks operad in the little disks operad when **On the Differential Structure of Metric Measure Spaces and Applications** Nicola Gigli,2015-06-26 The main goals of this paper are i To develop an abstract differential calculus on metric measure spaces by investigating the duality relations between differentials and gradients of Sobolev functions This will be achieved without calling into play any sort of analysis in charts our assumptions being the metric space is complete and separable and the measure is Radon and non negative ii To employ these notions of calculus to provide via integration by parts a general definition of distributional Laplacian thus giving a meaning to an expression like where is a function and is a measure iii To show that on spaces with Ricci curvature bounded from below and dimension bounded from above the Laplacian of the distance function is always a measure and that this measure has the standard sharp comparison properties This result requires an additional assumption on the space which reduces to strict convexity of the norm in the case of smooth Finsler structures and is always satisfied on spaces with linear Laplacian a situation which is analyzed in detail Railway Safety, Reliability, and Security: Technologies and Systems Engineering Flammini, Francesco,2012-05-31 Human errors as well as deliberate sabotage pose a considerable danger to passengers riding on the

modern railways and have created disastrous consequences To protect civilians against both intentional and unintentional threats rail transportation has become increasingly automated Railway Safety Reliability and Security Technologies and Systems Engineering provides engineering students and professionals with a collection of state of the art methodological and technological notions to support the development and certification of real time safety critical railway control systems as well as the protection of rail transportation infrastructures **The Democratic Dilemma of American Education** Arnold Shober,2018-04-19 This compelling new book asks How can American education policy be consistent with democratic ideals Robust democracy is the combination of participation self rule equality understanding and inclusion but these norms can produce contradictory policy Local control in education policy can undermine educational equality Participation in teachers unions can improve working conditions but thwart self rule by local taxpayers The Democratic Dilemma of American Education draws on contemporary research in political science and education policy to offer remarkably balanced insights into these challenging issues Expertly navigating through local state and federal layers of education policy Arnold Shober examines contemporary controversies over education governance teachers unions and collective bargaining school funding school choice academic accountability and desegregation Shober describes the inherent practical dilemmas of current policy and the difficulties policymakers face in overcoming them to produce lasting educational reform in a democratic federal system of government Timely engaging and accessible this is the ideal resource for courses in public policy as well as education and politics *Defense Acquisition Trends, 2015* Jesse Ellman,Andrew P. Hunter,Rhys McCormick,Gregory Sanders,2016-02-19 This study examines contracting trends at the U S Department of Defense DoD It relies on empirical analysis of DoD contracting transaction data from the open source Federal Procurement Data System FPDS The authors seek to identify and study emergent trends in the contracting data and marry that analysis with discussion of changing goals and methods for the larger acquisition system *Hecke Operators and Systems of Eigenvalues on Siegel Cusp Forms* Kazuyuki Hatada,2021-06-18 View the abstract Sums of Reciprocals of Fractional Parts and Multiplicative Diophantine Approximation Victor Beresnevich,Alan Haynes,Sanju Velani,2020-04-03 *Fundamental Solutions and Local Solvability for Nonsmooth Hormander's Operators* Marco Bramanti,Luca Brandolini,Maria Manfredini,Marco Pedroni,2017-09-25 The authors consider operators of the form in a bounded domain of where are nonsmooth H rmander s vector fields of step such that the highest order commutators are only H lder continuous Applying Levi s parametrix method the authors construct a local fundamental solution for and provide growth estimates for and its first derivatives with respect to the vector fields Requiring the existence of one more derivative of the coefficients the authors prove that also possesses second derivatives and they deduce the local solvability of constructing by means of a solution to with H lder continuous The authors also prove estimates on this solution **Mechanics of Flow-Induced Sound and Vibration, Volume 2** William K. Blake,2017-08-14 Mechanics of Flow Induced Sound and Vibration Volume 2 Complex Flow Structure Interactions Second Edition enables

readers to fully understand flow induced vibration and sound unifying the disciplines of fluid dynamics structural dynamics vibration acoustics and statistics in order to classify and examine each of the leading sources of vibration and sound induced by various types of fluid motion Starting from classical theories of aeroacoustics and hydroacoustics a formalism of integral solutions valid for sources near boundaries is developed and then broadened to address different source types including hydrodynamically induced cavitation and bubble noise turbulent wall pressure fluctuations pipe and duct systems lifting surface flow noise and vibration and noise from rotating machinery Each chapter is illustrated with comparisons of leading formulas and measured data Combined with its companion book Mechanics of Flow Induced Sound and Vibration Volume 1 General Concepts and Elementary Sources the book covers everything an engineer needs to understand flow induced sound and vibration This book will be a vital source of information for postgraduate students engineers and researchers with an interest in aerospace ships and submarines offshore structures construction and ventilation Presents every important topic in flow induced sound and vibration Covers all aspects of the topics addressed from fundamental theory to the analytical formulas used in practice Provides the building blocks of computer modeling for flow induced sound and vibration

Advances in Information Technology Borworn Papasratorn,Kittichai Lavangnananda,Wichian Chutimaskul,Vajirasak Vanijja,2010-10-19 It was our intention to organize IAIT 2010 as the place where researchers and ind trial practitioners could share their work and achievements in information technology both theoretical and in application This is the fourth time we have organized IAIT to serve as a venue to foster collaboration among industry and academia from different parts of the world A lot has been achieved since the launch of the first IAIT in 2005 however many challenges remain to be addressed in the years to come IAIT 2010 drew attendance from leading professionals in both industry and academes as in IAIT 2009 In addition to the relevant program offered by IAIT 2010 the conference p vided an excellent environment to meet peers in the IT profession build relationships and exchange lessons learned During the conference participants presented and d cussed the latest topics in information technology ranging from technical knowledge and experimentation to future strategic directions As the Internet continues to reach out even further almost everything in our daily life is accessible via IP addresses our societies need to recognize that we need new knowledge to make this advancement become a benefit to all life in this world It is almost impossible to gain this new knowledge without contributions from our c leagues working in various aspects of information technology Some times new knowledge found in one area can help simplify difficult task in another Together we can make our world better by creating applications from information technology **Artificial Intelligence and Soft Computing, Part II** Leszek Rutkowski,Rafał Scherer,Ryszard Tadeusiewicz,Lotfi A. Thomas,2021-06-18 This paper is a contribution to the study of the subgroup structure of excep tional algebraic groups over algebraically closed elds of arbitrary characteristic Following Serre a closed subgroup of a semisimple algebraic group G is called irreducible if it lies in no proper parabolic subgroup of G In this paper we com plete the classi cation of irreducible connected subgroups of exceptional algebraic groups providing an explicit set of representatives for the conjugacy classes of such subgroups Many consequences of this classi cation are also given These include results concerning the representations of such subgroups on various G modules for example the conjugacy classes of irreducible connected subgroups are determined by their composition factors on the adjoint module of G with one exception A result of Liebeck and Testerman shows that each irreducible connected sub group X of G has only nitely many overgroups and hence the overgroups of X form a lattice We provide tables that give representatives of each conjugacy class of connected overgroups within this lattice structure We use this to prove results concerning the subgroup structure of G for example when the characteristic is 2 there exists a maximal connected subgroup of G containing a conjugate of every irreducible subgroup A1 of G **An Age of Accountability** John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *Selected Water Resources Abstracts* ,1980-05 **Digital Technology and the Practices of Humanities Research** Jennifer Edmond,2020-01-30 How does technology impact research practices in the humanities How does digitisation shape scholarly identity How do we negotiate trust in the digital realm What is scholarship what forms can it take and how does it acquire authority This diverse set of essays demonstrate the importance of asking such questions bringing together established and emerging scholars from a variety of disciplines at a time when data is increasingly being incorporated as an input and output in humanities sources and publications Major themes addressed include the changing nature of scholarly publishing in a digital age the different kinds of gate keepers for scholarship and the difficulties of effectively assessing the impact of digital resources The essays

bring theoretical and practical perspectives into conversation offering readers not only comprehensive examinations of past and present discourse on digital scholarship but tightly focused case studies This timely volume illuminates the different forces underlying the shifting practices in humanities research today with especial focus on how humanists take ownership of and are empowered by technology in unexpected ways Digital Technology and the Practices of Humanities Research is essential reading for scholars students and general readers interested in the changing culture of research practices in the humanities and in the future of the digital humanities on the whole *Assessment and Teaching of 21st Century Skills* Patrick Griffin,Barry McGaw,Esther Care,2011-10-20 Rapid and seemingly accelerating changes in the economies of developed nations are having a proportional effect on the skill sets required of workers in many new jobs Work environments are often technology heavy while problems are frequently ill defined and tackled by multidisciplinary teams This book contains insights based on research conducted as part of a major international project supported by Cisco Intel and Microsoft It faces these new working environments head on delineating new ways of thinking about 21st century skills and including operational definitions of those skills The authors focus too on fresh approaches to educational assessment and present methodological and technological solutions to the barriers that hinder ICT based assessments of these skills whether in large scale surveys or classrooms Equally committed to defining its terms and providing practical solutions and including international perspectives and comparative evaluations of assessment methodology and policy this volume tackles an issue at the top of most educationalists agendas *A Homology Theory for Smale Spaces* Ian F. Putnam,2014-09-29 The author develops a homology theory for Smale spaces which include the basics sets for an Axiom A diffeomorphism It is based on two ingredients The first is an improved version of Bowen s result that every such system is the image of a shift of finite type under a finite to one factor map The second is Krieger s dimension group invariant for shifts of finite type He proves a Lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups The existence of such a theory was proposed by Bowen in the 1970s *Business Communication: Building Critical Skills* Kitty Locker,Stephen Kaczmarek,2013-03-08 Freedom Flexibility Focus Business Communication Building Critical Skills was built to provide the ultimate in freedom flexibility and focused classroom Broken into 30 modular chapters this text provides topic focused modules allowing instructors to customize their resources piece by piece to best suite their course and teaching style Each module has a strong workplace activity orientation supporting students to build critical skills in writing speaking and listening Locker Kaczmarek is grounded in solid business communication fundamentals and supports students to piece together what is needed to be a successful communicator for the 21st century *Introduction to Computable General Equilibrium Models* Mary E. Burfisher,2011-02-21 Computable general equilibrium CGE models are widely used by governmental organizations and academic institutions to analyze the economy wide effects of events such as climate change tax policies and immigration This book provides a practical how to

guide to CGE models suitable for use at the undergraduate college level Its introductory level distinguishes it from other available books and articles on CGE models The book provides intuitive and graphical explanations of the economic theory that underlies a CGE model and includes many examples and hands on modeling exercises It may be used in courses on economics principles microeconomics macroeconomics public finance environmental economics and international trade and finance because it shows students the role of theory in a realistic model of an economy The book is also suitable for courses on general equilibrium models and research methods and for professionals interested in learning how to use CGE models
