

Beginning Microsoft® Word: Practice 1

RUBRIC

0	3	5	8	10
Less than 25% of items completed correctly.	More than 25% of items completed correctly	More than 50% of items completed correctly	More than 75% of items completed correctly	All items completed correctly

Each step to complete is considered a single item, even if it is part of a larger string of steps.

Objectives:

The Learner will be able to

1. Find and use the copy command at least 75% of the time
2. Find and use the paste command at least 75% of the time
3. Explain that both Word and Excel have the same paste command
4. Find and use the cut command at least 75% of the time
5. Explain the function of the copy, paste, and cut commands

Cut, Copy and Paste

Cut, Copy and Paste are basic computer skills. These commands have been part of computers since 1984, long before there was Windows. Each and every program, including Microsoft Word, Excel, PowerPoint and Outlook, uses these functions.

Copy and Paste on the same document

Start the program Microsoft Word.

Insert a picture from ClipArt

Select the picture and copy and paste it five times

Copy and Paste to a different document

Start the program Microsoft Word.

Insert a picture from ClipArt

Select the picture and copy and paste

Go to New and open a blank document

Paste the picture into a new blank sheet

Copy and Paste into a different program:

Insert a picture in Microsoft Word and copy it

Start the program Microsoft Excel

Paste the picture into Excel

Cut

Cut removes the text or graphic and places it on the clipboard, ready to paste somewhere else. Try it: Insert two new pictures from ClipArt into Microsoft Word. Next to each picture, write what it is. Select ONE picture, go to Cut. Open a new blank document and go to Paste.

You do NOT have to save these practice files.

Eating in the Context of Well-being, Sustainability and 21st Century Food Science Hisayuki Uneyama,Ken Iwatsuki,Nobuyuki Sakai, Keiko Yasumatsu,2025-04-24 In the Anthropocene the global food system affects the geosystem and its biosphere and thus it is important for us to reconsider our eating style s and develop new and sustainable food systems This is particularly crucial since we are facing the risk of morbidity and mortality result from unhealthy diets In 2019 the EAT Lancet commission offered a new food standard that gratifies both health and environmental sustainability calling it the planetary health diet It is necessary for us to understand the sensory characteristics of the planetary health diet and how we humans select consume and develop foods and beverages to satisfy the standards of this new dietary approach These understandings add more fuel to promote the achievements of Sustainable Development Goals and of the planetary health diet This Research Topic aims to reveal the neural and biological mechanisms underlying the perception and selection of the planetary health diet Currently we have only little knowledge about taste and flavor perception so we do not know what sensory characteristics of foods are liked Also we do not know the mechanisms involved in selecting certain foods For example we know that excessive salt intake induces hypertension and or obesity but often we do not select low salt foods even when suffering from the high blood pressure We also know that animal models e g mice rats consume more of diets that impart a good taste for them As humans however we do not always eat so much of foods that may taste good for us and may consume foods or beverages that are not so enjoyable for us Thus a multidisciplinary approach is needed to challenge these topics

Diversity, equity and inclusion in sport and leisure Katherine Dashper,Thomas Fletcher,2016-01-08 Despite the mythology of sport bringing people together and encouraging everyone to work collectively to success modern sport remains a site of exclusionary practices that operate on a number of levels Although sports participation is in some cases at least becoming more open and meritocratic at the management level it remains very homogenous dominated by western white middle aged able bodied men This has implications both for how sport develops and how it is experienced by different participant groups across all levels Critical studies of sport have revealed that rather than being a passive mechanism and merely reflecting inequality sport via social agents interactions with sporting spaces is actively involved in producing reproducing sustaining and indeed resisting various manifestations of inequality The experiences of marginalised groups can

act as a resource for explaining contemporary political struggles over what sport means how it should be played and by whom and its place within wider society Central to this collection is the argument that the dynamics of cultural identities are contextually contingent influenced heavily by time and place and the extent to which they are embedded in the culture of their geographic location They also come to function differently within certain sites and institutions be it in one s everyday routine or leisure pursuits such as sport Among the themes and issues explored by the contributors to this volume are social inclusion and exclusion in relation to class race and ethnicity gender and sexuality social identities and authenticity social policy deviance and fandom This book was published as a special issue of Sport in Society **The Publishers Weekly** ,1917
