**The Mathematics Program Improvement Review** Ron Pelfrey,2005-12-15 How good is your school s mathematics program Test scores can provide some general trend information but what you and your students parents really need are specifics about the quality of the curriculum the effectiveness of the instruction and the school s overall capacity to support mathematics learning The Mathematics Program Improvement Review MPIR is a proven evaluation process focused on standards for high quality mathematics programs in grades K 12 Based on research into effective program evaluation

methods the MPIR approach uses multiple data sources to clarify exactly what is working within an individual school's math program and what is not. Author and MPIR developer Ron Pelfrey has used this process to evaluate mathematics programs in more than 300 rural, urban, and suburban schools and has trained hundreds of educators to conduct reviews. Now this handbook makes the MPIR process and its benefits available to everyone. Inside you'll find guidelines for training review team members and all the materials needed to conduct a review including Lists of standards and indicators for the 10 essential components of an effective mathematics program, Templates for questionnaires, interviews, and classroom observations, Detailed evaluation rubrics, Forms for compiling ratings and generating a final report. Whether used as a basis for informal faculty or departmental discussion to promote best practices in a particular area such as curriculum or instruction, or to guide a formal program evaluation, this book will help any school or district apply MPIR tools and procedures to bring about positive change in students' mathematics learning. Note: This product listing is for the Adobe Acrobat PDF version of the book.

Exploring the Math and Art Connection Daniel Jarvis, Irene Naested, 2012. Daniel Jarvis and Irene Naested highlight the natural association between math and art in a series of practical ideas for the classroom because when students understand the math/art connection, their understanding and confidence increase in both subjects. Through innovative teaching strategies and more than 100 rich learning experiences, Jarvis and Naested give teachers a wealth of engaging tools to explore the math/art connection with their own students. This connection is established through examinations of natural and human-designed objects from how pine cone scales spiral out in a Fibonacci sequence to how geometric shapes combine in architecture to form some of the most beautiful structures on the planet.

*Egghead's Guide to Geometry* Peterson's, 2013-08-20. *egghead's Guide to Geometry* will help students improve their understanding of the fundamental concepts of geometry. With the help of Peterson's new character *egghead*, students can strengthen their math skills with narrative cartoons and graphics. Along the way, there are plenty of study tips and exercises making this the perfect guide for students struggling to improve their knowledge of geometry for standardized tests. *egghead's* strategies and advice for improving geometry skills: Foundational geometry for students who need basic and remedial instruction; Dozens of sample exercises and solutions with loads of geometric figures and illustrations; Easy-to-read lessons with fun graphics that provide essential information and skills to help those students who learn visually.
