Marianne van den Boomen,2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society Three decades of societal and cultural alignment of new media yielded to a host of innovations trials and problems accompanied by versatile popular and academic discourse New Media Studies crystallized internationally into an established academic discipline which begs the question where do we stand now which new issues have emerged now that new media are taken for granted and which riddles remain unsolved and is contemporary digital culture indeed all about you or do we still not really understand the digital machinery and how it constitutes us as you From desktop metaphors to Web 2 0 ecosystems from touch screens to blogging to e learning from role playing games to Cybergoth music to wireless dreams this timely volume offers a showcase of the most up to date research in the field from what may be called a digital materialist perspective **On the Origin of Products** Arthur O. Eger,Huub

Ehlhardt, 2018-02-15 In this new work Arthur O Eger and Huub Ehlhardt present a Theory of Product Evolution They challenge the popular notion that we owe the availability of products solely to genius inventors Instead they present arguments that show that a process of variation selection and accumulation of know how to make and know what function to realize provide an explanation for the emergence of new types of products and their subsequent development into families of advanced versions This theory employs a product evolution diagram as an analytical framework to reconstruct the development history of a product family and picture it as a graphical narrative The authors describe the relevant literature and case studies to place their theory in context The Product Phases Theory is used to create predictions on the most likely next step in the evolution of a product offering practical tools for those involved in new product development
