

Chapter 1

Foundations of Engineering Economy

Basic Concepts

- 1.1 Financial units for economically best.
- 1.2 Morale, goodwill, dependability, acceptance, friendship, convenience, aesthetics, etc.
- 1.3 Measure of worth is a criterion used to select the economically best alternative. Some measures are present worth, rate of return, payback period, benefit/cost ratio.
- 1.4 The color I like, best fuel rating, roomiest, safest, most stylish, fastest, etc.
- 1.5 Sustainability: Intangible; installation cost: tangible; transportation cost: *intangible*; simplicity: intangible; taxes: tangible; resale value: tangible; morale: intangible; rate of return: tangible; dependability: intangible; inflation: tangible; acceptance by others: intangible; ethics: intangible.
- 1.6 Examples are: house purchase, car purchase, credit card (which ones to use), personal loans (and their rate of interest and repayment schedule), investment decisions of all types, when to sell a house or car.

Ethics

- 1.7 *This problem can be used as a discussion topic for a team-based exercise in class.*
 - (a) Most obvious are the violations of Canons number 4 and 5. Unfaithfulness to the client and deceptive acts are clearly present.
 - (b) The Code for Engineer's is only partially useful to the owners in determining sound bases since the contractor is not an engineer. Much of the language of the Code is oriented toward representation, qualifications, etc., not specific acts of deceit and fraudulent behavior. Code sections may be somewhat difficult to interpret in construction of a house.
 - (c) Probably a better source would be a Code for Contractor's or consulting with a real estate attorney.
- 1.8 Many sections could be identified. Some are: I.6; II.2 a and b; III.9 a and b.
- 1.9 Example actions are:
 - Try to talk them out of doing it now, explaining it is stealing.
 - Try to get them to pay for their drinks.

Engineering Economy Solution Manual:

Cases in Engineering Economy Theodore G. Eschenbach, 1989-03 This casebook in engineering economy illustrates the reality of economic analysis and managerial decision making in a way that standard texts cannot. The variety of cases included make this book a valuable supplement to any engineering economy or capital budgeting textbook. Provides an introductory chapter on case analysis, a solved case, and an overview of sensitivity analysis followed by 32 cases covering a wide range of real life situations. Some cases include hints for solution and a solutions manual referenced to major textbooks is available to adopters. **Engineering Economy** Ted Eschenbach, 2003-06 This text contains solutions to the problems featured in the main text. It is available free of charge to adopting professors. **Solutions Manual to Accompany Engineering Economics** James L. Riggs, 1977 **Solution Manual for Engineering Economic Analysis** Donald G. Newnan, Jerome P. Lavelle, Ted G. Eschenbach, 2000-06 *Basics of Engineering Economy* Leland Blank, Anthony Tarquin, 2007-10-11 This text covers the basic techniques and applications of engineering economy for all disciplines in the engineering profession. The writing style emphasizes brief, crisp coverage of the principle or technique discussed in order to reduce the time taken to present and grasp the essentials. The objective of the text is to explain and demonstrate the principles and techniques of engineering economic analysis as applied in different fields of engineering. This brief text includes coverage of multiple attribute evaluation for instructors who want to include non economic dimensions in alternative evaluation and the discussion of risk considerations in the appendix compared to Blank's comprehensive text where these topics are discussed in two unique chapters. **Instructor's Solutions Manual for Engineering Economy** Professor Emeritus of Engineering Management Ted Eschenbach, Ted Eschenbach, 2011 Engineering economy Holger George Thuesen, Wolter J. Fabrycky, 1964 **Engineering Economy for Engineering Managers** Turan Gonen, 1990-08 **Engineering Economy** LeLand T. Blank, 1989-01-01 **Essentials of Engineering Economic Analysis** Donald G. Newnan, Jerome P. Lavelle, Ted G. Eschenbach, 2002 *Essentials of Engineering Economic Analysis* Second Edition includes the first twelve chapters of the best selling textbook *Engineering Economic Analysis* Eighth Edition 0 19 515152 6 by Donald G. Newnan, Jerome P. Lavelle and Ted G. Eschenbach. This compact version introduces the fundamental concepts of engineering economics and covers essential time value of money principles for engineering projects. It isolates the problems and decisions engineers commonly face and examines the necessary tools for analyzing and solving those problems. Revised in 2001, the second edition focuses on the use of spreadsheets, teaching students to use the enormous capabilities of modern software. The majority of the chapters conclude with sections designed to help students create spreadsheets based on the material covered in each chapter. The book's organization allows omission of spreadsheet instruction without loss of continuity. This emphasis on spreadsheet computations provides excellent preparation for real life engineering economic analysis problems. New Features: Over sixty five new homework problems added to the ends of chapters. Improved content and readability. Greater

emphasis on the use of spreadsheets in real life situations Chapter 2 Engineering Costs and Cost Estimating an entirely new chapter suggested by adopters answers the question Where do the numbers come from An increased focus on the MACRS depreciation method with a new section on recaptured depreciation and asset disposal An updated section on after tax replacement efforts in Chapter 12 Replacement Analysis Supplements Solutions Manual for Engineering Economic Analysis This 350 page manual has been revised and checked by the authors for accuracy all end of chapter problems are fully solved by the authors Available free to adopting professors ISBN 1 57645 052 X Compound Interest Tables A separate 32 page pamphlet with the compound interest tables from the textbook Classroom quantities are free to adopting professors ISBN 0 910554 08 0 Exam Files Fourteen quizzes prepared by the authors test student knowledge of chapter content Available free in electronic format to adopting professors Call 1 800 280 0280 or send an email to college_oup_usa.org Instructor Lecture Notes and Overhead Transparencies Available free in electronic format to adopting professors Call 1 800 280 0280 or send an email to college_oup_usa.org Student s Quick Study Guide Engineering Economic Analysis This 320 page book features a 32 page summary of engineering economy followed by 386 problems each with detailed solutions Available for purchase only ISBN 1 57645 050 3
