Science

Purpose: To have students investigate and demonstrate the science behind floods and flash floods.

1. Distribute "The Science of Floods and Flash Floods" Student Handouts, pages 1 and 2 to small groups of students. Have them follow the steps to demonstrate the science behind flooding. Encourage them to consider:
 - a. "What is flooding?"
 - b. "What are the characteristics of floods and flash floods?"
 - c. "Why are floods dangerous?"
2. Have groups research to find and develop other ways to demonstrate the science behind and the power of floods. Have them turn these demonstrations into lesson plans, complete with handouts for others in the class.

Language Arts Extension:

People have tried many techniques to "tame" floods, including damming, digging irrigation channels, directing drainage patterns, filling in lowlands, and building dikes and canals. As technology improved, these projects grew larger, more sophisticated, and generally more efficient. Have students research methods of flood control/river dike/canal building technologies.

- How has the technology changed?
- Which technologies worked/best better than others?
- What current technologies are used?
- What improvements and innovations are under research and development?

Will the Three Gorges Dam, which China built as a means to remove people from floods and to provide a source of water and energy for the people of Shanghai, hurt or harm the environment along the Yangtze River?
