

4.1.2 INSPECTING THE METER ROLLER

The meter roller is designed to allow inspection of the meter roller when product is in the tank.

Roller heads (A) which rotate the inspection wheel (B).

Removal of the cover exposes the air chamber through which air passes to the metering. The baffle panel (C) which supports the air flow the meter roller, is also removed.

Using handle (D) and screw for exposed baffle panel (E) up slightly. There is the side of the baffle with edges and protrusions from the end wall of the meter tank and when the baffle is the removed and the inspection opening.

The meter roller is now fully exposed, as well as the roller heads. Rotation of the meter roller by hand will enable proper location of the roller and divider.

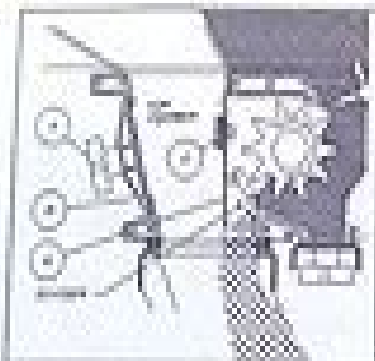

Figure 4.1.2a Inspecting the Meter Roller

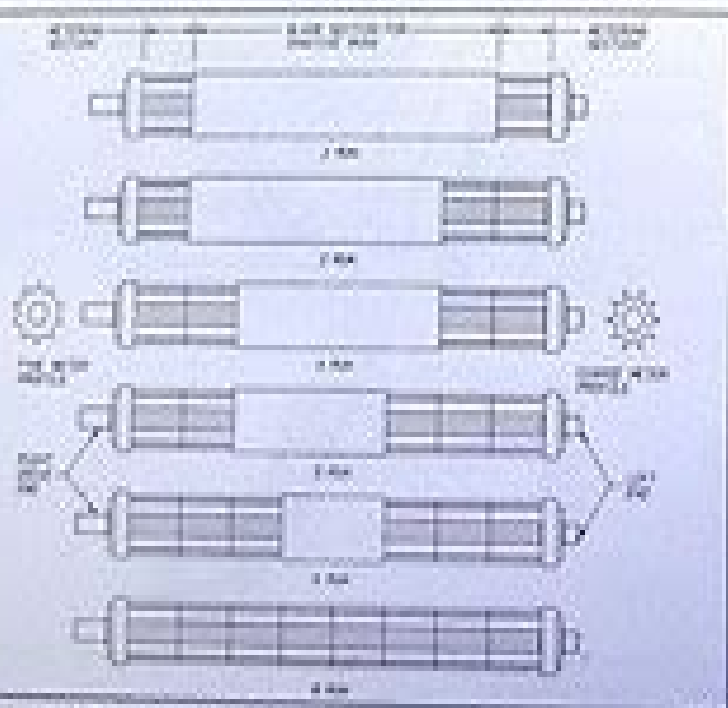

Figure 4.1.2b Meter Rollers for the Meter Tank

4.1.3 DIVIDING THE PRODUCT

Figure 4.1.3a illustrates a 2 inch meter roller (A) in the meter tank.

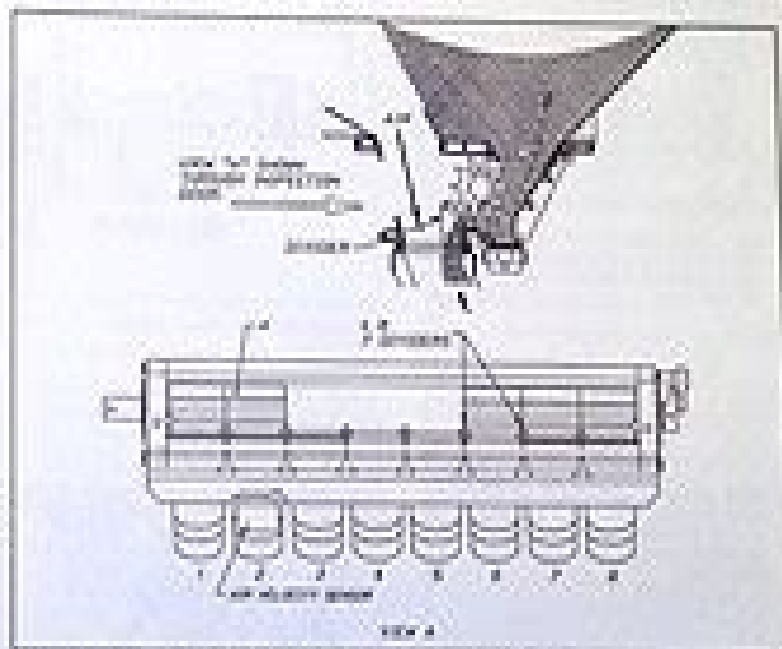

Figure 4.1.3a Dividing the Product Using a 2 Inch Meter Roller (Front View)

Four dividers (B) are located equally across the width of the roller. These split the product flow into four 1, 2, 3, 4, 5 and 6.

Four 1, 2 and 3 are not moving product because the 2 inch meter roller is not feeding product in the meter tank. These lines are used to be "divided".

Changing meter roller dimensions the primary product divider into 4 inch, 5 inch, 6 inch or 8 inch. Figure 4.1.3b illustrates the meter rollers available.

The divider blades are given in the factory to be equally spaced. These divider blades separate and feed product into the 2 inch tank of the meter tank. These lines are used to be "divided" lines.

Using two, three or four lines across the width of 1, 2, 3, 4 and 5 to produce an output. Page 5 (Figure 4.1.3b) are also spaced in the maximum size of one 4, 5 and 6 in the meter tank. It is apparent that these pages are in place to prevent unwanted product distribution.

Section 4.1.4 in Parts and Service Manual describes divider blade spacing to match divider pan configuration. These/Can flow and now this is a necessary procedure for dividing with the 2 inch. However, some were very well to make this adjustment.
