Stories About Science in Law

David S. Caudill, 2016-04-01 Presenting examples of how literary accounts can provide a supplement to our understanding of science in law this book challenges the view that law and science are completely different It focuses on stories which explore the relationship between law and science especially cultural images of science that prevail in legal contexts Contrasting with other studies of the transfer and construction of expertise in legal settings this book considers the intersection of three interdisciplinary projects law and science law and literature and literature and science Looking at the appropriation of scientific expertise into law from these perspectives this book presents an original introduction into how we can gain insight into the use of science in the courtroom and in policy and regulatory settings through literary sources

Human Cloning in the Media Joan Haran, Jenny

Kitzinger, Maureen McNeil, Kate O'Riordan, 2007-10-15 This book provides an intensive exploration of recent popular representations of human cloning genetics and the concerns which they generate and mobilise It is a timely contribution to current debates about the public communication of science and about the cultural and political stakes in those debates Taking the UK as its main case study with cross cultural comparisons with the USA and South Korea the book explores the proposition that genomics is the publicly mediated science par excellence through detailed reference to the rhetoric and images around human reproductive and therapeutic cloning which have proliferated in the wake of the completion of the Human Genome Project 2000 The book offers a set of distinctive analyses of media and cultural texts including press and television news Hollywood and independent film drama documentaries art exhibits and websites and in dialogue with the producers and consumers of these texts From these investigations key issues are foregrounded the image of the scientist scientific expertise and institutions the governance of science the representation of women's bodies as the subjects and objects of biotechnology and the constitution of publics both as objects of media debate and as their intended audience This examination demonstrates the importance of mediation media institutions and media texts in the production of scientific knowledge Countering models that see the media as simply a channel through which scientific knowledge passes this book will emphasise the importance of communications technologies in the production of modern scientific knowledge and their particular significance in contemporary genomics It will argue that human genomic science and cloning as its current iconic manifestation has to be understood as a complex cultural production
