Best Practice Guidelines for the Re-Introduction of Great Apes Benjamin Beck, 2007 From the website Although the IUCN has previously established working protocols for plant and animal re introduction the great apes present unique challenges and concerns owing to their singular cognitive development This prompted the Primate Specialist Group to reconsider the existing guidelines in terms of the specific needs of great apes The resulting synthesis representing the expert opinion of primatologists and re introduction practitioners is presented here as part of the series of best practices documents Specifically designed for rehabilitators and specialists in re introduction these guidelines start from the fundamental assumption that re introductions should not endanger wild populations of great apes or the ecosystems they inhabit Equally important is the health and welfare of the individual great apes being re introduced as well as the caretaker staff and the residents of the surrounding areas The re introduction guidelines also require that the factors which first threatened great apes in the proposed site of release have been addressed and resolved

Provides the most complete and effective study guide to prepare users for passing the CISSP exam, giving them exactly what they need to pass the test. Authored by Eric Conrad, who has prepared hundreds of professionals for passing the CISSP exam through SANS, a popular and well-known organization for information security professionals. Covers all of the new information in the Common Body of Knowledge, updated in January 2015, and also provides two exams, tiered end-of-chapter questions for a gradual learning curve, and a complete self-test appendix.

**Art Therapy, Research and Evidence-based Practice** Andrea Gilroy, 2006-10-09 This is an important and topical book coming at a time when there is growing pressure to show evidence of good practice in order to reassure the prospective client and to demonstrate financial accountability. It gives valuable guidelines and examples for art therapists. The book is innovative and inspiring, and the author's enthusiasm shines through. I end with the last line of this topical, readable, relevant book: one that encapsulates its content. We need the facts, we need the figures, but we need the stories and the pictures too. *Therapy Today* This book makes a major contribution to the field of art therapy by reviewing, in an accessible and informed manner, the issues around the development of research-informed practice. The author offers an overview of different traditions of inquiry that will be of value to practitioners as well as those actually involved in carrying out research. John McLeod, Tayside Institute for Health Studies, University of Abertay Dundee. This impressive book is lively, inspiring, and innovative. Andrea Gilroy's energetic enthusiasm for her subject is infectious. She breathes life into the topics of research and EBP. This rich exploration combines a rigorous investigation of the existing literature with intelligent, original, and practical suggestions. A thorough, informative approach that challenges existing thinking. This is a must for art therapists at last: a book that places art at the centre of our evidence, in a convincingly argued, accessible, and rewarding read. Professor Joy Schaverien, PhD, *Art Therapy around the World* is under increasing pressure to become more evidence-based. As a result, practitioners now need to get to grips with what constitutes evidence, how to apply research in appropriate ways, and also how to contribute to the body of evidence through their own research and other related activities. Written specifically for art therapy practitioners and students, *Art Therapy Research: Evidence-Based Practice* traces the background to EBP, critically reviews the existing art therapy research, explains the research process, links research with the development of clinical guidelines, and describes the knowledge and skills needed to demonstrate efficacy. Drawing on her own experience as a researcher, practitioner, and lecturer, Andrea Gilroy looks at the implications of EBP for art therapy and examines common concerns about the threat it may pose to the future provision of art therapy within public services. *Art Therapy Research: Evidence-Based Practice* addresses issues which are

critical to the future development and even the survival of art therapy Combining insightful analysis with practical guidance and examples this is an ideal resource for practitioners and for those in training Andrea Gilroy is Reader in Art Psychotherapy at Goldsmiths University of London
