Grade One Lessons On Bullying:

Evidence-Based Bullying Prevention Programs for Children and Youth Dagmar Strohmeier, Gil G.

Noam, 2012-04-17 Bullying is a hot topic at schools across the nation. Chronic involvement in bullying is associated with many intrapersonal, interpersonal, and academic problems, and even sporadic experiences of bullying are harmful. During the last two decades, several prevention and intervention programs have been developed by research teams all over the world. Many of these programs have been adopted in the United States. This volume introduces five evidence-based anti-bullying programs developed in European countries where much of the early innovations and adaptations have occurred. Based on state-of-the-art knowledge, this volume answers: How can educators detect that bullying is going on in their school? How can educators respond competently in acute bullying situations? How can educators prevent bullying in their schools in the long run? This is the 133rd volume of *New Directions for Youth Development*, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions. *Handbook of Evidence-Based Interventions for Children and Adolescents* Lea

Theodore, 2016-07-20 A step-by-step resource for treating more than 40 prevalent issues with proven strategies. This comprehensive handbook for evidence-based mental health and learning interventions with children and adolescents is distinguished by its explicit yet concise guidance on implementation in practice. With a compendium of proven strategies for resolving more than 40 of the most pressing and prevalent issues facing young people, the book provides immediate guidance and uniform step-by-step instructions for resolving issues ranging from psychopathological disorders to academic problems. Busy academic practitioners and trainees in schools and outpatient clinical settings will find this resource to be an invaluable desktop reference for facilitating well-informed decision making. Unlike other volumes that ignore or merely reference the evidence base of various interventions, this book focuses on providing immediate empirically supported guidance for putting these strategies into direct practice. Issues covered include crisis interventions and response, social and emotional issues, academic learning issues, psychopathological disorders, neuropsychological disorders, and the behavioral management of childhood health issues. Each chapter follows a consistent format including a brief description of the problem and associated characteristics, etiology, and contributing factors, and three evidence-based step-by-step sets of instructions for implementation. Additionally, each chapter provides several websites offering further information about the topic. Featuring contributions from leading scholars and practitioners on each issue covered, this book will be a valuable resource for child clinical and school psychologists, counselors, social workers, and therapists, as well as other health and mental health professionals whose primary practice is with children and adolescents. **Key Features:** Demonstrates step-by-step evidence-based interventions for more than 40 common childhood issues. Provides treatment procedures that can be immediately put into practice. Covers a wide range of mental health and academic learning issues for children and adolescents. Relevance for

both school based and clinically based practice Includes contributions by noted experts in the field *Bullying Prevention for Schools* Allan L.
