originates well before children are introduced to formal instruction 2 The notion that reading precedes writing or that writing precedes reading is a fallacy 3 Literacy blooms in real life settings and by performing real life activities that are used to get things done 4 The purposes of literacy for young children are as important in learning about writing and reading as are the dimensions of literacy 5 Children's cognitive development is important to their acquisition of literacy during the years from birth to six 6 Children learn written language when they actively engage in their world Competent teachers throughout the United States suggest that prior to attending school children have acquired a distinctive culture collection of experiences and group of abilities Vacca Vacca 2000 Many prekindergarten children have been in a group setting for three and four years such as a child care setting where teachers and caregivers teach them reading and writing
